This article [*Neurophoton.* 4(3), 031212 (2017)] was originally published online on 4 May 2017 with an error in a unit of applied light power. A sentence in Sec. 3.3 originally read, “Based on our optics, this LED excitation corresponds to an approximate 40 mW/mm<sup>2</sup> overall intensity.” That sentence has been modified to read, “Based on our optics, this LED excitation corresponds to an approximate 40 mW/cm<sup>2</sup> (or 0.4 mW/mm<sup>2</sup>) overall intensity.”

The stimulus velocity applied to the whisker also has been corrected throughout the paper. The correct velocity value is approximately 1200 deg/s instead of the previously stated 1700 deg/s.

This article was corrected online on 3 July 2017. It appears correctly in print.
