The CCC fee code is 0277-786X/13/\$18.00.

Printed in the United States of America.

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

vii	<i>Conference Committee</i>
ix	<i>Introduction</i>

SESSION 1 WATERMARK

- 8665 03 **Insertion, deletion robust audio watermarking: a set theoretic, dynamic programming approach** [8665-2]
A. Nadeau, G. Sharma, Univ. of Rochester (United States)
- 8665 04 **Impeding forgers at photo inception** [8665-3]
M. Kirchner, International Computer Science Institute (United States); P. Winkler, H. Farid, Dartmouth College (United States)
- 8665 05 **Watermark embedding in optimal color direction** [8665-4]
R. Lyons, A. Reed, J. Stach, Digimarc Corp. (United States)
- 8665 06 **Video game watermarking** [8665-5]
W. Berchtold, M. Schäfer, H. Liu, Fraunhofer-Institut für Sichere Informations-Technologie (Germany); F. Touceira Takahashi, Univ. de Porto (Portugal); A. Schmitz, waza! services UG (Germany); S. Zmudzinski, M. Steinebach, Fraunhofer-Institut für Sichere Informations-Technologie (Germany); J. Wieneke, Technische Univ. Darmstadt (Germany)

SESSION 2 SECURITY AND BIOMETRIC

- 8665 07 **Banknote authentication with mobile devices** [8665-6]
V. Lohweg, J. L. Hoffmann, H. Dörksen, R. Hildebrand, E. Gillich, Ostwestfalen-Lippe Univ. of Applied Sciences (Germany); J. Hofmann, J. Schaede, KBA-NotaSys S.A. (Switzerland)
- 8665 08 **Visibility enhancement and validation of segmented latent fingerprints in crime scene forensics** [8665-7]
A. Makrushin, Otto-von-Guericke-Univ. Magdeburg (Germany) and Fachhochschule Brandenburg (Germany); T. Kiertscher, Fachhochschule Brandenburg (Germany); M. Hildebrandt, J. Dittmann, Otto-von-Guericke-Univ. Magdeburg (Germany); C. Vielhauer, Otto-von-Guericke-Univ. Magdeburg (Germany) and Fachhochschule Brandenburg (Germany)
- 8665 09 **Printed fingerprints at crime scenes: a faster detection of malicious traces using scans of confocal microscopes** [8665-8]
M. Hildebrandt, S. Kiltz, J. Dittmann, Otto-von-Guericke-Univ. Magdeburg (Germany)

SESSION 3 CAMERA IDENTIFICATION

- 8665 0B **Sensor fingerprint digests for fast camera identification from geometrically distorted images** [8665-10]
M. Goljan, J. Fridrich, Binghamton Univ., SUNY (United States)
- 8665 0C **Case studies and further improvements on source camera identification** [8665-11]
K. Kurosawa, K. Kuroki, K. Tsuchiya, N. Igarashi, N. Akiba, National Research Institute of Police Science (Japan)
- 8665 0D **Forensic analysis of interdependencies between vignetting and radial lens distortion** [8665-12]
A. Fischer, T. Gloe, Technische Univ. Dresden (Germany)
- 8665 0E **A sneak peek into the camcorder path** [8665-13]
C. Ben Zid, S. Baudry, B. Chupeau, G. Doërr, Technicolor S.A. (France)

SESSION 4 GENERAL FORENSICS

- 8665 0F **Ballistic examinations based on 3D data: a comparative study of probabilistic Hough Transform and geometrical shape determination for circle-detection on cartridge bottoms** [8665-14]
R. Fischer, Fachhochschule Brandenburg (Germany); C. Vielhauer, Otto-von-Guericke Univ. Magdeburg (Germany) and Fachhochschule Brandenburg (Germany); M. Hildebrandt, S. Kiltz, J. Dittmann, Otto-von-Guericke-Univ. Magdeburg (Germany)
- 8665 0G **Photocopier forensics based on arbitrary text characters** [8665-15]
C. Wang, X. Kong, S. Shang, Dalian Univ. of Technology (China); X. You, Beijing Institute of Electronic Technology and Application (China)
- 8665 0H **Accelerating video carving from unallocated space** [8665-16]
H. Kalva, Florida Atlantic Univ. (United States); A. Parikh, Nirma Univ. of Science & Technology (India); A. Srinivasan, George Mason Univ. (United States)

SESSION 5 STEGANOGRAPHY

- 8665 0I **On the role of side information in steganography in empirical covers** [8665-19]
J. Fridrich, Binghamton Univ., SUNY (United States)
- 8665 0J **A study of embedding operations and locations for steganography in H.264 video** [8665-20]
A. Neufeld, A. D. Ker, Univ. of Oxford (United Kingdom)
- 8665 0K **Video steganography with multi-path motion estimation** [8665-21]
Y. Cao, X. Zhao, F. Li, Institute of Information Engineering of Chinese Academy of Sciences (China); N. Yu, Univ. of Science and Technology of China (China)

SESSION 6 STEGANALYSIS I

- 8665 0L **Random projections of residuals as an alternative to co-occurrences in steganalysis** [8665-22]
V. Holub, J. Fridrich, T. Denemark, Binghamton Univ., SUNY (United States)
- 8665 0M **The challenges of rich features in universal steganalysis** [8665-23]
T. Pevný, Czech Technical Univ. in Prague (Czech Republic); A. D. Ker, Univ. of Oxford (United Kingdom)
- 8665 0N **Exploring multitask learning for steganalysis** [8665-24]
J. Makelberge, A. D. Ker, Univ. of Oxford (United Kingdom)

SESSION 7 STEGANALYSIS II

- 8665 0O **Quantitative steganalysis using rich models** [8665-26]
J. Kodovský, J. Fridrich, Binghamton Univ., SUNY (United States)
- 8665 0P **A cost-effective decision tree based approach to steganalysis** [8665-25]
L. Li, Polytechnic Institute of New York Univ. (United States); H. T. Sencar, TOBB Univ. of Economics and Technology (Turkey); N. Memon, Polytechnic Institute of New York Univ. (United States)

SESSION 8 MISCELLANEOUS

- 8665 0Q **Stegatone performance characterization** [8665-27]
Y.-Y. Chen, Purdue Univ. (United States); R. Ulichney, M. Gaubatz, Hewlett-Packard Labs. (United States); S. Pollard, Hewlett-Packard Labs. (United Kingdom); C.-J. Tai, J. P. Allebach, Purdue Univ. (United States)
- 8665 0R **Image tampering localization via estimating the non-aligned double JPEG compression** [8665-28]
L. Wu, X. Kong, B. Wang, S. Shang, Dalian Univ. of Technology (China)

INTERACTIVE PAPER SESSION

- 8665 0S **A histogram shifting based RDH scheme for H.264/AVC with controllable drift** [8665-17]
Z. Shahid, W. Puech, Lab. d'Informatique de Robotique et de Microelectronique de Montpellier, CNRS, Univ. Montpellier 2 (France)

Keynote Session I

Adnan M. Alattar, Digimarc Corporation (United States)

1 Watermark

Svyatoslav V. Voloshynovskiy, University of Geneva (Switzerland)

2 Security and Biometric

Nasir D. Memon, Polytechnic Institute of New York University
(United States)

3 Camera Identification

Gwenaël Doërr, Technicolor S.A. (France)

4 General Forensics

Ton Kalker, DTS, Inc. (United States)

5 Steganography

Jessica Fridrich, Binghamton University (United States)

6 Steganalysis I

Andrew D. Ker, University of Oxford (United Kingdom)

7 Steganalysis II

Gaurav Sharma, University of Rochester (United States)

8 Miscellaneous

Regunathan Radhakrishnan, Dolby Laboratories, Inc. (United States)

Introduction

It is our pleasure to bring to you the papers presented at the 2013 Media Watermarking, Security, and Forensics Conference, the premier forum for disseminating high quality cutting-edge research in these areas for the past fifteen years. Over this period, this conference has served as an excellent venue for researchers and practitioners in this field to present their innovative solutions in a timely manner and to keep abreast of the latest developments in watermarking, security, and forensics.

The conference this year was very successful. Twenty-four quality papers were presented by reputable academic, industry, and government institutions and many more quality papers were submitted but could not be accommodated. The presentations spanned the areas of watermarking, security and biometrics, camera identification and forensics, steganography, and steganalysis. Moreover, the conference included well-received and illuminating keynote speeches, panel discussions, and demonstrations from representatives of world-class companies.

Speakers from companies preeminent in the field of watermarking, fingerprinting, and content identification gave the two keynote speeches. In the first, Jaap Haitma from Civolution discussed converting audio watermarking research into a technology startup. In the second, Thabet Alfshawi from Google discussed the background, the challenges, and the roadmap ahead for the YouTube content identification system. Both keynotes were very informative and well-received.

Panelists from respected universities and leading companies engaged in three panel discussions. The first panel discussed the future of watermarking and the question of whether or not watermarking is a solved problem looking for an application. The panel was moderated by Adnan Alattar from Digimarc Corporation and included panelists from Digimarc, Irdeto, and the University of Rochester. The second panel focused on the topics of content identification and copy fraud. Nasir Memon from New York Polytechnic University moderated, and the panel included representatives from FairUse, Gracenote, Audible Magic, and Purdue University. The third panel discussed which field is winning the competition between steganography and steganalysis. This panel was moderated by Tomas Filler from Digimarc and included panelists from University of Oxford, University of Binghamton, and Johnson & Johnson Technology Consultants. All panel discussions were well attended by appreciative and engaged audiences.

Three special demonstrations were given by Digimarc, Audible Magic, and Technicolor. Digimarc showcased their latest watermarking application, in which watermarking is used in packaging as a complement to barcodes to increase check-out speed at the point of sale. Audible Magic and Technicolor each demonstrated their state-of-the-art second-screen applications to enhance the experience of users watching TV or listening to radio. Although these two

demonstrations were similar, their underlying technologies are completely different. While Audible Magic's approach is based on audio fingerprinting, Technicolor's solution relies on audio watermarking. All demonstrations were very enlightening regarding the great potential of both watermarking and fingerprinting technologies.

The conference audience expressed appreciation of the high quality of the technical presentations and the outstanding participation by representatives of industry. The conference chairs would like to thank all authors, participants, keynote speakers, panelists, moderators, and demonstrators, as well as the technical committee, for their efforts in making this year's conference a great success. We are looking forward to continuing this trend with another very successful conference next year.

Thanks.

Adnan M. Alattar
Nasir D. Memon
Chad D. Heitzenrater
