Volume 9567

Proceedings of SPIE 0277-786X, V. 9567

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Organic Photovoltaics XVI, edited by Zakya H. Kafafi, Paul A. Lane, Ifor D. W. Samuel, Proc. of SPIE Vol. 9567,
956701 · © 2015 SPIE · CCC code: 0277-786X/15/\$18 · doi: 10.1117/12.2218298

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Organic Photovoltaics XVI*, edited by Zakya H. Kafafi, Paul A. Lane, Ifor D. W. Samuel, Proceedings of SPIE Vol. 9567 (SPIE, Bellingham, WA, 2015) Six-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a six-digit CID article numbering system structured as follows:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

PHOTOPHYSICS OF ORGANIC SEMICONDUCTORS WITH PHOTOVOLTAIC APPLICATIONS

9567 0C	The effect of 2D-Langevin and trap-assisted recombination on the open circuit voltage in organic solar cells [9567-15]
---------	---

APPLICATIONS OF NANOPHOTONICS

9567 0H	Nano-photonic organic solar cell architecture for advanced light management utilizing dual photonic crystals (Invited Paper) [9567-11]
---------	---

PEROVSKITE SOLAR CELLS: JOINT SESSION WITH CONFERENCES 9549 AND 9567

9567 0L	Hysteresis-free, stable and efficient perovskite solar cells achieved by vacuum-treated thermal annealing of $\text{CH}_3\text{NH}_3\text{PbI}_3$ [9567-21]
---------	---

CHARGE TRANSFER STATES AND PROCESSES

9567 0M	Charge generation in organic solar cell materials studied by terahertz spectroscopy (Invited Paper) [9567-22]
9567 0N	On the relation between local and charge-transfer exciton binding energies in organic photovoltaic materials [9567-23]

ADVANCES IN ORGANIC SOLAR CELLS AND DETECTORS

9567 0W	Design of low band gap small molecules with alkyldicyanovinyl acceptor and different donor groups for efficient bulk heterojunction organic solar cells [9567-32]
---------	--

MORPHOLOGY AND PROCESSING OF ORGANIC SOLAR CELLS

9567 0X	The effect of thermal annealing on additive migration to the organic/metal interface in OPVs (Invited Paper) [9567-33]
9567 12	Ultrashort-pulsed laser processing and solution based coating in roll-to-roll manufacturing of organic photovoltaics [9567-38]

POSTER SESSION

- 9567 1D **Interface trap density effect on efficiency of fullerene organic Schottky diode** [9567-49]
- 9567 1F **Verification of effect of electric field on electron transport in TiO₂ electrode** [9567-51]
- 9567 1L **Time-resolved terahertz spectroscopy of electrically conductive metal-organic frameworks doped with redox active species** [9567-57]
- 9567 1Y **Multiscale analysis of the effect of micro-phase separation on the charge transfer at the PEDOT:PSS and P3HT:PCBM layer interface** [9567-74]
- 9567 24 **Study of PEDOT: PSS and BCP thicknesses effect on SubPc/C₆₀ organic solar cell efficiency** [9567-81]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chair

Zakya H. Kafafi, Lehigh University (United States)

Conference Chair

Zakya H. Kafafi, Lehigh University (United States)

Conference Co-Chairs

Paul A. Lane, U.S. Naval Research Laboratory (United States)

Ifor D. W. Samuel, University of St. Andrews (United Kingdom)

Conference Program Committee

Natalie Banerji, Université de Fribourg (Switzerland)

Pierre M. Beaujuge, King Abdullah University of Science and
Technology (Saudi Arabia)

Christoph J. Brabec, Friedrich-Alexander-Universität
Erlangen-Nürnberg (Germany)

Paul L. Burn, The University of Queensland (Australia)

Antonio F. Facchetti, Polyera Corporation (United States)

René A. J. Janssen, Technische Universiteit Eindhoven (Netherlands)

Bernard Kippelen, Georgia Institute of Technology (United States)

David G. Lidzey, The University of Sheffield (United Kingdom)

Thuc-Quyen Nguyen, University of California, Santa Barbara
(United States)

Ana F. Nogueira, Universidade Estadual de Campinas (Brazil)

Dana C. Olson, National Renewable Energy Laboratory
(United States)

Barry P. Rand, Princeton University (United States)

Sean E. Shaheen, University of Colorado at Boulder (United States)

Natalie Stingelin, Imperial College London (United Kingdom)

He Yan, Hong Kong University of Science and Technology
(Hong Kong, China)

Yang Yang, University of California, Los Angeles (United States)

Session Chairs

- 1 Organic Photovoltaics Keynote Session
Ifor D. W. Samuel, University of St. Andrews (United Kingdom)
 - 2 Solution Processed Perovskite Solar Cells
Ifor D. W. Samuel, University of St. Andrews (United Kingdom)
 - 3 Photophysics of Organic Semiconductors with Photovoltaic Applications
Natalie Banerji, Université de Fribourg (Switzerland)
 - 4 Applications of Nanophotonics
Vladimir Dyakonov, Julius-Maximilians-Universität Würzburg (Germany)
 - 5 Perovskite Solar Cells: Joint Session with Conferences 9549 and 9567
David G. Lidzey, The University of Sheffield (United Kingdom)
Sophia C. Hayes, University of Cyprus (Cyprus)
 - 6 Charge Transfer States and Processes
Paul L. Burn, The University of Queensland (Australia)
 - 7 Advances in Organic Solar Cells and Detectors
He Yan, Hong Kong University of Science and Technology (Hong Kong, China)
 - 8 Morphology and Processing of Organic Solar Cells
Aram Amassian, King Abdullah University of Science and Technology (Saudi Arabia)
 - 9 Lifetime and Stability Issues for Organic and Perovskite Solar Cells
Ana F. Nogueira, Universidade Estadual de Campinas (Brazil)
 - 10 Organic and Electrode Interfaces in Organic Solar Cells
Sean E. Shaheen, University of Colorado at Boulder (United States)
- Poster Session
Pierre M. Beaujuge, King Abdullah University of Science and Technology (Saudi Arabia)
