

Contents

ix Conference Committee

HOT TOPICS I

- 1 **Precision grinding of micro-aspherical surface** [TD02-06]
H. Suzuki, H. Shibutani, Toyohashi Univ. of Technology (Japan); T. Higuchi, Univ. of Tokyo (Japan); O. Horiuchi, Toyohashi Univ. of Technology (Japan)
- 4 **Compensation technology of glass molding accuracy** [TD02-24]
T. Kamano, M. Katsuki, Toshiba Machine Co., Ltd. (Japan)
- 7 **New method to control form and texture on industrial-sized lenses** [TD02-08]
D. D. Walker, Univ. College London (United Kingdom) and Zeeko Ltd. (United Kingdom); R. Morton, G. McCavana, Zeeko Ltd. (United Kingdom); G. Klein, J. Greese, Loh Optikmaschinen AG (Germany)
- 8 **It's the subtleties that make the difference** [TD02-23]
U. Birnbaum, O. R. Falkenstörfer, Th. Herrmann, S. Köhler, H. Lauth, J. Röder, R. Schreiner, JENOPTIK Laser, Optik, Systeme GmbH (Germany)
- 12 **Grinding technology of small optical element molds** [TD02-25]
M. Katsuki, K. Urushibata, Toshiba Machine Co., Ltd. (Japan)

OPTICAL SURFACING AND FIGURING

- 15 **Development and demonstration of precision optical contouring by wet etch figuring** [TD02-01]
J. A. Britten, M. C. Rushford, S. N. Dixit, Lawrence Livermore National Lab. (USA)
- 18 **Microwave-assisted thermal polishing of aspheric optical glass surfaces by a CO₂ laser** [TD02-02]
H.-K. Tönshoff, A. Ostendorf, C. Kulik, T. Bauer, P.-O. Wiechell, Laser Zentrum Hannover e.V. (Germany)
- 21 **Automated figuring and polishing of replication mandrels for x-ray telescopes** [TD02-03]
G. A. Wright, D. A. Content, C. Fleetwood, P. Arsenovic, D. Colella, L. Kolos, NASA Goddard Space Flight Ctr. (USA)
- 24 **Prepolishing on a CNC platform with bound abrasive contour tools** [TD02-05]
A. E. Schoeffler, Ctr. for Optics Manufacturing (USA) and Monroe Community College (USA); L. L. Gregg, J. M. Schoen, E. M. Fess, M. Hakiel, Ctr. for Optics Manufacturing (USA); S. D. Jacobs, Ctr. for Optics Manufacturing (USA) and Univ. of Rochester (USA)
- 28 **Minimizing chatter in deterministic microgrinding by process parameter selection** [TD02-07]
S. Tong, S. M. Gracewski, P. D. Funkenbusch, Ctr. for Optics Manufacturing (USA)

Optifab 2003: Technical Digest, edited by Walter C. Czajkowski, Toshihide Dohi, Hans Lauth, Harvey M. Pollicove, Proc. of SPIE Vol. 10314 (Vol. TD02), 1031401 · © (2003) 2017 SPIE
CCC code: 0277-786X/17/\$18 · doi: 10.1117/12.2283990

- 31 **New polishing technology for large mirrors and lenses** [TD02-09]
D. D. Walker, Univ. College London (United Kingdom) and Zeeko Ltd. (United Kingdom);
A. T. H. Beaucamp, Zeeko Ltd. (United Kingdom); D. Brooks, A. King, Univ. College London
(United Kingdom); R. Morton, G. McCavana, Zeeko Ltd. (United Kingdom)
- 32 **Fixed abrasive flat lapping with 3M Trizact diamond tile abrasive pads** [TD02-10]
T. D. Fletcher, B. Dronen, F. T. Gobena, E. Larson, 3M Co. (USA)
- 36 **Development of a nanomachining system and its application** [TD02-11]
N. Kawasegi, N. Morita, S. Yamada, N. Takano, T. Oyama, Toyama Univ. (Japan)
- 38 **Effects of fluid jet polishing on optical surfaces** [TD02-12]
F. H. Mrakovcic, Univ. of Rochester (USA) and Center for Optics Manufacturing (USA);
B. Sternberg, J. Shapiro, Univ. of Rochester (USA); S. M. Gracewski, P. D. Funkenbusch, Univ.
of Rochester (USA) and Center for Optics Manufacturing (USA)
- 41 **New multiwire fixed abrasive slicing technology (FAST)** [TD02-13]
F. Schmid, M. B. Smith, C. P. Khattak, Crystal Systems, Inc. (USA)

OPTICAL COMPONENT MANUFACTURING

- 44 **Mirror grinding of silicon with EPD pellets: applying a constant pressure machining** [TD02-72]
H. Shibutani, Y. Yamamoto, H. Maeda, H. Suzuki, O. Horiuchi, Toyohashi Univ. of Technology
(Japan)
- 48 **Optical components manufacturing by room temperature molding** [TD02-16]
G. Boara, F. Costa, L. Costa, M. Sparpaglione, Novara Technology (Italy)
- 53 **Centration errors: That's great but...** [TD02-17]
B. Light, Optimax Systems, Inc. (USA)
- 55 **Fabrication of blanks, figuring, polishing, and testing of astronomical mirrors for SALT, VST, LAMOST, and other projects** [TD02-21]
M. A. Abdulkadyrov, S. P. Belousov, A. N. Ignatov, V. E. Patrikeev, V. V. Pridnya,
A. V. Polyanchikov, V. V. Rumyantsev, A. V. Samuylov, A. P. Semenov, Y. A. Sharov, JSC
Lytkarino Optical Glass Plant (Russia)
- 58 **Electroforming of optical tooling in high-strength Ni-Co alloy** [TD02-73]
B. Stein, NiCoForm, Inc. (USA)

MRF TECHNOLOGY AND APPLICATION

- 60 **Integration of magnetorheological finishing (MRF) technology for ultraprecision optical manufacturing** [TD02-29]
A. M. H. Pun, N. S. W. Chan, D. C. H. Louie, L. M. Li, Hong Kong Productivity Council (Hong Kong)

- 65 **Magnetorheological finishing of a diamond turned poly(methylmethacrylate) flat** [TD02-30]
J. E. DeGroote, Ctr. for Optics Manufacturing (USA); S. D. Jacobs, Ctr. for Optics Manufacturing (USA) and Univ. of Rochester (USA); J. M. Schoen, Ctr. for Optics Manufacturing (USA); H. J. Romanofsky, QED Technologies (USA); I. A. Kozhina, Ctr. for Optics Manufacturing (USA)
- 69 **Effect of process parameters on surface morphology in MRF** [TD02-31]
A. B. Shorey, S. Gorodkin, W. Kordonski, QED Technologies (USA)

SURFACE CHARACTERIZATION, CHEMISTRY, AND MATERIAL SCIENCE

- 72 **Mechanical behavior of silica fibers in various moisture conditions** [TD02-32]
N. Gougeon, R. El Abdi, M. Poulain, Univ. de Rennes (France)
- 75 **Polishing rate of fused silica compared to glasses BK7 and SF6** [TD02-33]
J. C. Lambropoulos, S. D. Jacobs, Ctr. for Optics Manufacturing (USA) and Univ. of Rochester (USA)
- 79 **Study of silica subsurface defects by using cathodoluminescence and trapping of charge measurements** [TD02-37]
J. Bigarré, CEA Le Ripault (France)
- 81 **Grain decoration in aluminum oxynitride (ALON) from polishing on bound abrasive laps** [TD02-39]
A. E. Marino, J. Hayes, L. L. Gregg, Ctr. for Optics Manufacturing (USA); S. D. Jacobs, Ctr. for Optics Manufacturing (USA) and Univ. of Rochester (USA)
- 84 **Determination of subsurface damage in single crystalline optical materials** [TD02-40]
J. A. Randi, J. C. Lambropoulos, S. D. Jacobs, Ctr. for Optics Manufacturing (USA) and Univ. of Rochester (USA); S. N. Shafrir, Ctr. for Optics Manufacturing (USA)
- 87 **Characterizing optical polishing pitch** [TD02-41]
R. Varshneya, J. E. DeGroote, Ctr. for Optics Manufacturing (USA) and Univ. of Rochester (USA); L. L. Gregg, Ctr. for Optics Manufacturing (USA); S. D. Jacobs, Ctr. for Optics Manufacturing (USA) and Univ. of Rochester (USA)
- 90 **Lightweight mirrors from single crystal silicon** [TD02-42]
V. T. Bly, D. A. Content, NASA Goddard Space Flight Ctr. (USA); D. O. Moore, Bullen Ultrasonics, Inc. (USA); L. D. Kolos, NASA Goddard Space Flight Ctr. (USA)
- 93 **Low thermal expansion poreless ceramics** [TD02-43]
J. Sugawara, K. Abe, T. Mukai, Nippon Steel Corp. (Japan)
- 96 **Nanocrystalline ceria dispersions for ultrafine polishing and defect reduction in EUVL photomask blank manufacture** [TD02-44]
P. G. Murray, D. Coy, R. Brotzman, Nanophase Technologies Corp. (USA); T. Leutbecher, K. Walter, F. Ruggeberg, F. Lenzen, Schott Lithotec AG (Germany)

THIN FILM TECHNOLOGY

- 99 **Filter design for EDFA to be used for DWDM application** [TD02-45]
A. Shrivastava, Government Engineering College (India); R. P. Singh, Maulana Azad National Institute of Technology (India)
- 102 **Cleaning of parts for precision-optic and glass substrates before coating** [TD02-46]
J. B. Strobel, R. M. Hohl, UCM AG (Switzerland)
- 106 **Coated optical components for DUV and VUV laser applications** [TD02-48]
S. Laux, H. Bernitzki, D. Fasold, M. Klaus, H. Lauth, JENOPTIK Laser, Optik, Systeme GmbH (Germany)
- 108 **Optical sol-gel coating production for French high-power laser drivers** [TD02-49]
P. Prené, CEA Le Ripault (France); E. Lavastre, CEA-CESTA (France); P. F. Belleville, CEA Le Ripault (France)

OPTICAL METROLOGY AND TESTING

- 110 **Combining optical metrology with mechanical analysis** [TD02-50]
V. L. Genberg, G. J. Michels, K. Doyle, Sigmadyne, Inc. (USA)
- 113 **Radius tolerancing** [TD02-52]
R. Plympton, Optimax Systems, Inc. (USA)
- 116 **Metrology challenges of thin optical wafers for high finesse etalons** [TD02-53]
J. Burke, B. F. Oreb, R. P. Netterfield, CSIRO (Australia); K. Hibino, National Institute of Advanced Industrial Science and Technology (Japan)
- 119 **Transmission spheres: more than just a reference surface** [TD02-54]
J. Pinto, Optimax Systems, Inc. (USA)
- 121 **Hyper-Rayleigh scattering in third and second harmonics from silver island films** [TD02-55]
E. M. Kim, O. A. Aktsipetrov, M.V. Lomonosov Moscow State Univ. (Russia)
- 125 **Refractive index anisotropy in optics using a birefringence mapper** [TD02-56]
J. Sternal, Ctr. for Optics Manufacturing (USA); S. N. Shafir, J. A. Randi, Ctr. for Optics Manufacturing (USA) and Univ. of Rochester (USA); L. L. Gregg, Ctr. for Optics Manufacturing (USA); S. D. Jacobs, Ctr. for Optics Manufacturing (USA) and Univ. of Rochester (USA)
- 128 **High-accuracy interferometric measurements of EUVL mask blank substrates** [TD02-58]
R. E. Bills, S. Tang, K. Freischlad, ADE Phase Shift (USA)
- 131 **Short time determination of the standard deviation and the correlation radius of optical surface roughness by using their coherent images** [TD02-59]
V. I. Mandrossov, Moscow Institute of Physics and Technology (Russia)
- 134 **Extending the range of interferometry through subaperture stitching** [TD02-60]
P. Dumas, J. Fleig, G. Forbes, P. E. Murphy, QED Technologies (USA)

- 138 **Novel method for computing reference wave error in optical surface metrology** [TD02-61]
P. E. Murphy, J. Fleig, G. Forbes, P. Dumas, QED Technologies (USA)
- 141 **In-process surface measurement of replication material during UV curing** [TD02-63]
M. Meeder, R. Zehnder, S. Debruyne, O. W. Faehnle, FISBA Optik AG (Switzerland)

OPTICAL ASSEMBLY

- 144 **Lens design for production** [TD02-65]
B. H. Walker, Walker Associates (USA)
- 147 **The business of precision optics manufacturing: photonics in the Rochester region** [TD02-68]
M. P. Mandina, Optimax Systems, Inc. (USA)
- 149 **Some thoughts on lens assembly and lens centering** [TD02-69]
V. Guyenot, C. Siebenhaar, C. Damm, A. Gebhardt, Fraunhofer-Institute for Applied Optics and Precision Engineering (Germany)
- 152 **Laser beam soldering of micro-optical components** [TD02-70]
R. Eberhardt, H. Banse, E. Beckert, W. Stöckl, Fraunhofer-Institute for Applied Optics and Precision Engineering (Germany)
- 155 **Segmented lens mount for projection optics** [TD02-71]
G. Kalkowski, C. Damm, T. Peschel, Fraunhofer-Institute for Applied Optics and Precision Engineering (Germany); A. Leital, Carl Zeiss Jena GmbH (Germany); N. Kunze, Philips GmbH Outsert Ctr. (Germany)

HOT TOPICS II

- 158 **Nanoprecision mechanical fabrication for optical elements** [TD02-14]
H. Ohmori, K. Katahira, Y. Watanabe, W. Lin, Y. Dai, T. Suzuki, Y. Uehara, RIKEN—The Institute of Physical and Chemical Research (Japan)
- 162 **Strategies for achieving nanosurface finish with a grinding wheel in viewpoint of abrasive grain size** [TD02-35]
M. Miyashita, Nanotec Associates (Japan); A. Kanai, Ashikaga Institute of Technology (Japan); M. Daito, Sanwa Precision K.K. (Japan)
- 171 **Progress of modern interference layer design methods and coating technologies demonstrated by the manufacturing of uncemented wide-angle thin film polarizers** [TD02-47]
G. Wurlitzer, U. Suess, H. Lauth, JENOPTIK Laser, Optik, Systeme GmbH (Germany)
- 173 **Ultraprecision diamond turning of optical crystals for advanced infrared optical components** [TD02-15]
J. Yan, J. Tamaki, A. Kubo, Kitami Institute of Technology (Japan)
- 177 *Author Index*

Conference Committee

Conference Chairs

Walter C. Czajkowski, Eastman Kodak Company (USA) and APOMA (USA)
Toshihide Dohi, OptiWorks Inc. (Japan)
Hans Lauth, JENOPTIK Laser, Optik, Systeme GmbH (Germany)
Harvey M. Pollicove, Center for Optics Manufacturing (USA)

Cochairs

Robert E. Fischer, Optics 1, Inc. (USA)
Donald Golini, QED Technologies (USA)
Stephen D. Jacobs, Center for Optics Manufacturing (USA) and University of Rochester (USA)
Masahide Katsuki, Toshiba Machine Company, Ltd. (Japan)
Gerald Klein, Loh Optikmaschinen AG (Germany)
Daniel Malacara Hernandez, Centro de Investigaciones en Optica, AC (Mexico)
Masakazu Miyashita, Ashikaga Institute of Technology (Japan)
Hirofumi Suzuki, Toyohashi University of Technology (Japan)

Steering Committee

Michael J. Bechtold, OptiPro Systems (USA)
Christopher T. Cotton, ASE Optics, Inc. (USA)
Walter C. Czajkowski, Eastman Kodak Company (USA)
John T. Fried, LOH Optical Machinery (USA)
Donald Golini, QED Technologies (USA)
Arne Lindquist, Schneider Optical Machines, LLC (USA)
Michael P. Mandina, Optimax Systems, Inc. (USA)
Paul Meier-Wang, AccuCoat Inc. (USA)
Richard A. Nasca, Corning Tropel (USA)
John J. Nemechek, FISBA Optik LLC (USA)
Harvey M. Pollicove, Center for Optics Manufacturing (USA)
Carolyn Russell, Center for Optics Manufacturing (USA)
John M. Schoen, Center for Optics Manufacturing (USA)
Jim M. Sydor, Sydor Optics, Inc. (USA)
