Proc. of SPIE Vol. 12049 1204901-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

WELCOME AND OPENING REMARKS

12049 02 **NDE 4.0: a five years success story** [12049-101]

THE WORLD OF NDE 4.0 II

12049 03 **UAS-based autonomous visual inspection of airplane surface defects** [12049-18]

12049 04 **Non-destructive evaluation of the condition of a UAV's propellers by means of acoustics** [12049-19]

12049 05 **Condensing measurement data along the process chain into a single geometrical digital shadow** [12049-20]

12049 06 **Remote damage inspection with AR custom headset** [12049-21]

12049 07 **Development of soft sensors based on neural networks for detection of anomaly working condition in automated machinery** [12049-22]

12049 08 **A deep learning approach for fault detection and RUL estimation in bearings** [12049-3]

SMART SENSING AND PREDICTIVE SMART MAINTENANCE

12049 09 **VibroAware: vibroacoustic sensing for interaction with paper on a surface** [12049-4]

12049 0A **Development and characterization of environmentally friendly multifunctional protective coatings** [12049-5]

12049 0B **An approach for fault detection based on multibody simulations and feature selection algorithm** [12049-6]

12049 0C **Data fusion for the efficient NDT of challenging aerospace structures: a review** [12049-8]

NDE FOR ENERGY SYSTEMS

12049 0D **Non-contact vibration analysis for detection of geometric deviations and defects: example of a ceramic solid-state electrolyte for energy storage applications [12049-10]**

12049 0E **Advanced nano-reinforced concrete for exotic applications [12049-11]**

POSTER SESSION

12049 0F **Detection and evaluation of fabric defects using warp-weft statistical analysis [12049-23]**

12049 0G **Deep learning-based safety behavior identification of operations and maintenance personnel on a substation [12049-24]**

Conference Committee

Symposium Chairs

Anastasia Muliana, Texas A&M University (United States)
Wieslaw M. Ostachowicz, The Szewalski Institute of Fluid-Flow Machinery (Poland)
Haiying Huang, The University of Texas at Arlington (United States)
Hani E. Naguib, University of Toronto (Canada)

Conference Chair

Norbert G. Meyendorf, Fraunhofer IKTS (Germany) and University of Dayton (United States)

Conference Co-Chairs

Saman Farhangdoust, Florida International University (United States)
Christopher Niezrecki, University of Massachusetts Lowell (United States)

Conference Program Committee

Ali Abdul-Aziz, Kent State University (United States)
Steven R. Anton, Tennessee Technological University (United States)
Nicolas P. Avdelidis, Cranfield University (United Kingdom)
