SPIE

Volume 7031

Proceedings of SPIE, 0277-786X, v. 7031

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Active Photonic Crystals II*, edited by Sharon M. Weiss, Ganapathi S. Subramania, Florencio García-Santamaría, Proceedings of SPIE Vol. 7031 (SPIE, Bellingham, WA, 2008)
Article CID Number.

ISSN 0277-786X
ISBN 9780819472519

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/08/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

- v *Conference Committee*
- vii *Revivals of molecular nonlinear optics in physics, chemistry, and life sciences (Plenary Paper)* [7040-100]
J. Zyss, Lab. de Photonique Quantique et Moléculaire, CNRS, Institut d'Alembert (France)

SESSION 1 EMISSION PROPERTIES OF ACTIVE PHOTONIC CRYSTALS I

- 7031 03 **Laser applications of self-organized organic photonic crystals (Invited Paper)** [7031-02]
S. Furumi, National Institute for Materials Science (Japan)

SESSION 2 FABRICATION OF ACTIVE PHOTONIC CRYSTALS

- 7031 07 **Integration of photonic crystals in dye sensitized solar cells** [7031-06]
S. Colodrero, A. Mihi, M. E. Calvo, M. Ocaña, H. Míguez, Instituto de Ciencia de Materiales de Sevilla (Spain)

SESSION 3 PROPAGATION OF LIGHT IN ACTIVE PHOTONIC CRYSTALS

- 7031 09 **Fano filter modal analysis based on transferred silicon nanomembranes on flexible substrates** [7031-08]
Z. Qiang, Univ. of Texas at Arlington (United States) and Fujian Normal Univ. (China);
L. Chen, H. Yang, Univ. of Texas at Arlington (United States); H. Pang, Z. Ma, Univ. of Wisconsin, Madison (United States); W. Zhou, Univ. of Texas at Arlington (United States)
- 7031 0A **The impact of metallic contacts on propagation losses of an underlying photonic crystal waveguide** [7031-09]
P. Kaspar, R. Kappeler, ETH Zürich (Switzerland); F. Karouta, Technische Univ. Eindhoven (Netherlands); F. Robin, P. Strasser, H. Jäckel, ETH Zürich (Switzerland)

SESSION 4 EMISSION PROPERTIES OF ACTIVE PHOTONIC CRYSTALS II

- 7031 0C **Photonic crystal chips for optical communications and quantum information processing (Invited Paper)** [7031-11]
D. Englund, I. Fushman, A. Faraon, B. Ellis, J. Vučković, Stanford Univ. (United States)

SESSION 5 MODELING AND SIMULATION OF ACTIVE PHOTONIC CRYSTALS

- 7031 0F **Tuning the longitudinal dispersion and angular dispersion of photonic crystals (Invited Paper)** [7031-14]
W. Jiang, Rutgers Univ. (United States)

- 7031 OG **Photonic crystal defect tuning for optimized light-matter interaction** [7031-15]
C. Kang, S. M. Weiss, Vanderbilt Univ. (United States)

SESSION 6 TUNING ACTIVE PHOTONIC CRYSTALS

- 7031 OK **Functional periodically-poled crystals for powerful intracavity CW difference-frequency-generation of widely tunable high spectral purity IR radiation** [7031-19]
P. De Natale, Istituto Nazionale di Ottica Applicata, CNR (Italy) and European Lab. for Nonlinear Spectroscopy (Italy); I. Galli, Istituto Nazionale di Ottica Applicata, CNR (Italy) and Univ. di Firenze (Italy); G. Giusfredi, D. Mazzotti, P. Cancio, Istituto Nazionale di Ottica Applicata, CNR (Italy) and European Lab. for Nonlinear Spectroscopy (Italy)

POSTER SESSION

- 7031 OL **Effect of interface on the far-field focusing in a two-dimensional honeycomb photonic crystal** [7031-21]
P.-L. Yong, Univ. of Science and Technology of China (China) and Key Lab. of Quantum Information (China); J.-L. Guo, Univ. of Science and Technology of China (China) and Institute of Optics and Electronics (China); L.-K. Xue, Univ. of Science and Technology of China (China)

Author Index

Conference Committee

Symposium Chairs

David L. Andrews, University of East Anglia Norwich (United Kingdom)
James G. Grote, Air Force Research Laboratory (United States)
Kevin J. Liddane, Oerlikon Optics USA, Inc. (United States)

Conference Chairs

Sharon M. Weiss, Vanderbilt University (United States)
Ganapathi S. Subramania, Sandia National Laboratories
(United States)
Florencio García-Santamaría, Los Alamos National Laboratory
(United States)

Program Committee

Paul V. Braun, University of Illinois at Urbana-Champaign (United States)
Shanhui Fan, Stanford University (United States)
Stephen H. Foulger, Clemson University (United States)
Rachel Jakubiak, Air Force Research Laboratory (United States)
Michal F. Lipson, Cornell University (United States)
Ceferino López, Instituto de Ciencia de Materiales de Madrid (Spain)
Michael J. Sailor, University of California, San Diego (United States)
Ralf B. Wehrspohn, Martin-Luther-Universität Halle-Wittenberg
(Germany)
Pierre Wiltzius, University of Illinois at Urbana-Champaign
(United States)

Session Chairs

- 1 Emission Properties of Active Photonic Crystals I
Florencio García-Santamaría, Los Alamos National Laboratory
(United States)
- 2 Fabrication of Active Photonic Crystals
David J. Norris, University of Minnesota (United States)
- 3 Propagation of Light in Active Photonic Crystals
Wei Jiang, Rutgers University (United States)

- 4 Emission Properties of Active Photonic Crystals II
Florencio García-Santamaría, Los Alamos National Laboratory
(United States)
- 5 Modeling and Simulation of Active Photonic Crystals
Ali Adibi, Georgia Institute of Technology (United States)
- 6 Tuning Active Photonic Crystals
Sharon M. Weiss, Vanderbilt University (United States)
