Volume 9248

Proceedings of SPIE 0277-786X, V. 9248

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Unmanned/Unattended Sensors and Sensor Networks X, edited by Edward M. Carapezza,
Panos G. Datskos, Christos Tsamis, Proc. of SPIE Vol. 9248, 924801 · © 2014 SPIE
CCC code: 0277-786X/14/\$18 · doi: 10.1117/12.2081282

Proc. of SPIE Vol. 9248 924801-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/14/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

- v *Authors*
vii *Conference Committee*

SENSORS & TECHNOLOGY I

- 9248 04 **Nonlinear mechanical resonators for ultra-sensitive mass detection** [9248-3]
9248 06 **Spray-on superhydrophobic coatings with high mechanical durability for anti-corrosion and anti-soiling applications** [9248-5]

SENSORS AND TECHNOLOGY II

- 9248 07 **Sense and avoid radar for micro/nano robots (Invited Paper)** [9248-7]
9248 0A **Bi-material resonant infrared thermal detector and array** [9248-10]

SENSORS, ALGORITHMS, AND SYSTEMS I

- 9248 0B **Simple fiber optic sensor for applications in security systems** [9248-13]
9248 0C **Improvement of optical and acoustical technologies for the protection: Project IMOTEP: Network of heterogeneous sensor types for the protection of camps or mobile troops** [9248-14]

SENSORS, ALGORITHMS, AND SYSTEMS II

- 9248 0D **Encounter detection to improve navigation in a group of unattended vehicles (Invited Paper)** [9248-33]
9248 0E **Inference of vessel intent and behaviour for maritime security operations** [9248-6]
9248 0H **Aerial networking communication solutions using Micro Air Vehicle (MAV)** [9248-32]

SENSORS, ALGORITHMS, AND SYSTEMS III

- 9248 0I **All-digital radar architecture** [9248-11]
9248 0J **Independent motion detection with a rival penalized adaptive particle filter** [9248-12]
9248 0K **PADF electromagnetic source localization using extremum seeking control** [9248-15]

- 9248 OL **Coordinating UAV information for executing national security-oriented collaboration**
[9248-16]
- 9248 OM **Implementing the distributed consensus-based estimation of environmental variables in unattended wireless sensor networks** [9248-17]
- 9248 OO **Adaptive multi-sensor biomimetics for unsupervised submarine hunt (AMBUSH): Early results**
[9248-34]

FREE-SPACE OPTICAL COMMUNICATION

- 9248 OP **DAZZLE project: UAV to ground communication system using a laser and a modulated retro-reflector (Invited Paper)** [9248-19]
- 9248 OQ **Channel modelling for free-space optical inter-HAP links using adaptive ARQ transmission (Best Student Paper)** [9248-20]
- 9248 OR **Demonstration of high-rate laser communications from fast airborne platform: flight campaign and results** [9248-21]
- 9248 OS **Novel non-mechanical fine tracking module for retroreflective free space optics** [9248-22]
- 9248 OT **Assessment of laser tracking and data transfer for underwater optical communications**
[9248-23]
- 9248 OU **In-door artificial atmospheric beamlet as a test-bed for adaptive optics** [9248-24]
- 9248 OV **Modulation techniques used in earth-to-satellite and inter-satellite free space optical links**
[9248-25]
- 9248 OW **Lower bound on number and sizes of telescopes in an optical array receiver for deep space optical communication** [9248-26]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chair

David H. Titterton, Defence Science and Technology Laboratory
(United Kingdom)

Symposium Co-chairs

Reinhard Ebert, Fraunhofer-Institut für Optronik, Systemtechnik und
Bildauswertung (Germany)
Ric H. Schleijsen, TNO Defence, Security and Safety (Netherlands)

Conference Chairs

Edward M. Carapezza, EMC Consulting, LLC (United States)
Panos G. Datskos, Oak Ridge National Laboratory (United States)
Christos Tsamis, National Center for Scientific Research Demokritos
(Greece)

Conference Programme Committee

Mehdi F. Anwar, University of Connecticut (United States)
Mark E. Campbell, Cornell University (United States)
Pierre J. Corriveau, Naval Undersea Warfare Center (United States)
Sachi V. Desai, U.S. Army Armament Research, Development and
Engineering Center (United States)
John M. Dolan, Carnegie Mellon University (United States)
Grant R. Gerhart, Consultant (United States)
Todd M. Hintz, Space and Naval Warfare Systems Command
(United States)
Myron E. Hohil, U.S. Army Armament Research, Development and
Engineering Center (United States)
Ivan Kadar, Interlink Systems Sciences, Inc. (United States)
Leslie Laycock, BAE Systems (United Kingdom)
Tariq Manzur, Naval Undersea Warfare Center (United States)
George C. McNamara, Naval Undersea Warfare Center
(United States)
Nino Srour, U.S. Army Research Laboratory (United States)
Huib A.J.M. van Hoof, TNO Defence, Security and Safety
(Netherlands)
Andre Samberg, Sec-Control Finland Ltd. (Finland)
Henry J. White, BAE Systems (United Kingdom)

Session Chairs

- 1 Unmanned/Unattended Sensors
Panos G. Datskos, Oak Ridge National Laboratory (United States)
Christos Tsamis, National Center for Scientific Research Demokritos (Greece)

- 2 Sensors & Technology I
Panos G. Datskos, Oak Ridge National Laboratory (United States)
Christos Tsamis, National Center for Scientific Research Demokritos (Greece)

- 3 Sensors and Technology II
Panos G. Datskos, Oak Ridge National Laboratory (United States)
Christos Tsamis, National Center for Scientific Research Demokritos (Greece)

- 4 Sensors, Algorithms, and Systems I
Edward M. Carapezza, EMC Consulting, LLC (United States)
Panos G. Datskos, Oak Ridge National Laboratory (United States)

- 5 Sensors, Algorithms, and Systems II
Panos G. Datskos, Oak Ridge National Laboratory (United States)
Edward M. Carapezza, EMC Consulting, LLC (United States)

- 6 Sensors, Algorithms, and Systems III
Panos G. Datskos, Oak Ridge National Laboratory (United States)
Edward M. Carapezza, EMC Consulting, LLC (United States)

- 7 Free-Space Optical Communication
Henry J. White, BAE Systems (United Kingdom)
Leslie Laycock, BAE Systems (United Kingdom)
