SPIE

Volume 8865

Proceedings of SPIE 0277-786X, V. 8865

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Instruments, Methods, and Missions for Astrobiology XVI, edited by Richard B. Hoover,
Gilbert V. Levin, Alexei Yu. Rozanov, Nalin C. Wickramasinghe, Proc. of SPIE Vol. 8865,
886501 © 2013 SPIE · CCC code: 0277-786X/13/\$18 · doi: 10.1117/12.2044193

Proc. of SPIE Vol. 8865 886501-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/13/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

vii *Conference Committee*

CHAIRS' WELCOME AND INTRODUCTIONS

- 8865 02 **Memorial tribute to astrobiology pioneers Dr. David S. Mckay and academician Georgy A. Zavarzin** [8865-1]
A. Y. Rozanov, Joint Institute for Nuclear Research (Russian Federation); S. V. Rozhnov, Paleontological Institute (Russian Federation); E. V. Pikuta, Athens State Univ. (United States); R. B. Hoover, The Univ. of Buckingham (United Kingdom) and Athens State Univ. (United States)

ASTROBIOLOGY OF MARS

- 8865 03 **Implications of Curiosity's findings for the Viking labeled-release experiment and life on Mars (Invited Paper)** [8865-2]
G. V. Levin, Arizona State Univ. (United States) and The Univ. of Buckingham (United Kingdom)
- 8865 04 **Perchlorates are compatible with life on Earth: Why not Mars?** [8865-3]
V. M. Kolb, Univ. of Wisconsin-Parkside (United States); R. Hoover, The Univ. of Buckingham (United Kingdom) and Athens State Univ. (United States)

BIOMOLECULES AND MICROFOSSILS IN CARBONACEOUS METEORITES AND TERRESTRIAL ROCKS I

- 8865 05 **Impact of prebiotic synthesis and diagenesis on the distribution, stereochemistry, and stable isotope composition of amino acids in carbonaceous meteorites (Invited Paper)** [8865-4]
M. H. Engel, The Univ. of Oklahoma (United States)
- 8865 06 **Fossilized diatoms in meteorites from recent falls in Sri Lanka (Invited Paper)** [8865-5]
R. B. Hoover, The Univ. of Buckingham (United Kingdom) and Athens State Univ. (United States); J. Wallis, Cardiff Univ. (United Kingdom); K. Wickramarathne, A. Samaranayake, Medical Research Institute (Sri Lanka); G. Williams, Athens State Univ. (United States); G. Jerman, NASA Marshall Space Flight Ctr. (United States); D. H. Wallis, N. C. Wickramasinghe, The Univ. of Buckingham (United Kingdom)
- 8865 07 **Acritarchs in carbonaceous meteorites and terrestrial rocks** [8865-8]
A. Y. Rozanov, Joint Institute for Nuclear Research (Russian Federation); R. B. Hoover, The Univ. of Buckingham (United Kingdom) and Athens State Univ. (United States)

- 8865 08 **Physical, chemical, and mineral properties of the Polonnaruwa stones** [8865-7]
J. Wallis, Cardiff Univ. (United Kingdom); N. C. Wickramasinghe, D. H. Wallis, N. Miyake,
M. K. Wallis, The Univ. of Buckingham (United Kingdom); R. B. Hoover, The Univ. of
Buckingham (United Kingdom) and Athens State Univ. (United States); A. Samaranayake,
K. Wickramaratne, Medical Research Institute (Sri Lanka); A. Oldroyd, Cardiff Univ. (United
Kingdom)
- 8865 0A **Comets and entropy hydrodynamics: How does evolution violate the 2nd law?** [8865-9]
R. B. Sheldon, Grassmere Dynamics LLC (United States); G. Webb, The Univ. of Alabama in
Huntsville (United States)

PREBIOTIC CHEMISTRY AND EXTRATERRESTRIAL LIFE

- 8865 0B **Development of the algorithm for life for the search for extraterrestrial life** [8865-10]
V. M. Kolb, Univ. of Wisconsin-Parkside (United States)
- 8865 0C **On the role of the molecular recognition principles in astrobiology** [8865-11]
V. M. Kolb, Univ. of Wisconsin-Parkside (United States)
- 8865 0D **Potential alternate life biochemistries** [8865-12]
G. Konesky, K-Plasma Ltd. (United States)

MICROBIAL EXTREMOPHILES I

- 8865 0E **Evolution of life in three-dimensional modeling (Invited Paper)** [8865-13]
E. Pikuta, A. Lewis, R. Meritt, D. Newland, G. Williams, Athens State Univ. (United States)
- 8865 0F **Some unique features of alkaliphilic anaerobes** [8865-25]
E. Roof, E. Pikuta, C. Otto, G. Williams, R. Hoover, Athens State Univ. (United States)
- 8865 0G **Elongation Factor-Tu (EF-Tu) proteins structural stability and bioinformatics in ancestral
gene reconstruction** [8865-14]
S. Dehipawala, A. Nguyen, G. Tremberger Jr., E. Cheung, P. Schneider, D. Lieberman,
T. Holden, T. Cheung, Queensborough Community College (United States)
- 8865 0H **Assessing fluctuating evolutionary pressure in yeast and mammal evolutionary rate
covariation using bioinformatics of meiotic protein genetic sequences** [8865-15]
S. Dehipawala, A. Nguyen, G. Tremberger Jr., E. Cheung, T. Holden, D. Lieberman,
T. Cheung, Queensborough Community College (United States)

MICROBIAL EXTREMOPHILES II

- 8865 0I **Autofluorescence characteristics of the red rain cells (Invited Paper)** [8865-17]
G. Louis, Cochin Univ. of Science and Technology (India); A. S. Kumar, Mahatma Gandhi
Univ. (India)

- 8865 OL **Biological entities isolated from the stratosphere (22-27km): case for their space origin** [8865-28]
M. Wainwright, The Univ. of Sheffield (United Kingdom) and The Univ. of Buckingham (United Kingdom); C. E. Rose, A. J. Baker, The Univ. of Sheffield (United Kingdom); N. C. Wickramasinghe, The Univ. of Buckingham (United Kingdom)

PREBIOTIC CHEMISTRY, HORIZONTAL GENE TRANSFER, AND PANSPERMIA

- 8865 OM **New cosmology requires life on cosmic scales (Invited Paper)** [8865-27]
C. H. Gibson, Univ. of California, San Diego (United States)
- 8865 OO **Influence of salts, including amino acids, on the rate and outcome of the in-water prebiotic reactions** [8865-21]
V. M. Kolb, Univ. of Wisconsin-Parkside (United States)
- 8865 OQ **2013; life is a cosmic phenomenon: the search for water evolves into the search for life** [8865-26]
W. E. Smith, CardioComm Solutions Inc. (Canada)
- 8865 OR **Galactic evolution and the increasing opportunities for life** [8865-23]
G. Konesky, K-Plasma Ltd. (United States)

Author Index

Conference Committee

Program Track Chair

Oswald H. Siegmund, University of California, Berkeley (United States)

Conference Chairs

Richard B. Hoover, Athens State University (United States) and
Buckingham Center for Astrobiology, University of Buckingham (United
Kingdom)

Gilbert V. Levin, Arizona State University (United States)

Alexei Yu. Rozanov, Paleontological Institute (Russian Federation)

Nalin C. Wickramasinghe, Buckingham Center for Astrobiology, University
of Buckingham (United Kingdom)

Conference Program Committee

Marina M. Astafieva, Paleontological Institute (Russian Federation)

Stanley M. Awramik, University of California, Santa Barbara (United States)

Asim Bej, The University of Alabama at Birmingham (United States)

Steven A. Benner, The Foundation For Applied Molecular Evolution (United
States)

Mark J. Burchell, University of Kent (United Kingdom)

Nathalie A. Cabrol, SETI Institute (United States)

Bin Chen, NASA Ames Research Center (United States)

Michael H. Engel, The University of Oklahoma (United States)

Daniel Fisher, University of Michigan (United States)

George E. Fox, University of Houston (United States)

Lyudmila M. Gerasimenko, Institute of Microbiology (Russian Federation)

Carl H. Gibson, University of California, San Diego (United States)

Todd Holden, Queensborough Community College (United States)

L. Paul Knauth, Arizona State University (United States)

Vera M. Kolb, University of Wisconsin-Parkside (United States)

Godfrey Louis, Cochin University of Science and Technology (India)

Stephen A. Macko, University of Virginia (United States)

Joseph D. Miller, The University of Southern California (United States)

Prasanta K. Mukhopadhyay, Global Geoenergy Research Ltd. (Canada)

Roland R. Paepe, Geobound International Ltd. (Netherlands)

Elena V. Pikuta, Athens State University (United States)

Nilton O. Rennó, University of Michigan (United States)

Charles V. Rice, The University of Oklahoma (United States)

Dongok Ryu, Yonsei University (Korea, Republic of)

Birgit I. Sattler, Leopold-Franzens-Universität Innsbruck (Austria)

Joseph Seckbach, The Hebrew University of Jerusalem (Israel)

Michael C. Storrie-Lombardi, Kinohi Institute (United States)

George Tremberger Jr., Queensborough Community College (United States)

Esta Van Heerden, University of the Free State (South Africa)

Nikolay P. Yushkin, Institute of Geology (Russian Federation)

Session Chairs

Chairs' Welcome and Introductions

Nalin C. Wickramasinghe, Buckingham Center for Astrobiology, University of Buckingham (United Kingdom)

Astrobiology of Mars

Michael H. Engel, The University of Oklahoma (United States)

Biomolecules and Microfossils in Carbonaceous Meteorites and Terrestrial Rocks I

Gilbert V. Levin, Arizona State University (United States)

Prebiotic Chemistry and Extraterrestrial Life

Nalin C. Wickramasinghe, Buckingham Center for Astrobiology, University of Buckingham (United Kingdom)

Microbial Extremophiles I

Carl H. Gibson, University of California, San Diego (United States)

Microbial Extremophiles II

W. Brigham Klyce, Astrobiology Research Trust (United States)

Prebiotic Chemistry, Horizontal Gene Transfer, and Panspermia

Jamie Wallis, Cardiff University (United Kingdom)

This Volume is Dedicated to the Memory of

Dr. David Stewart McKay

and

Academician Georgi Alexandrovich Zavarzin
