SPIE

Volume 9071

Proceedings of SPIE 0277-786X, V. 9071

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Infrared Imaging Systems: Design, Analysis, Modeling, and Testing XXV, edited by Gerald C. Holst, Keith A. Krapels,
Proc. of SPIE Vol. 9071, 907101 · © 2014 SPIE · CCC code: 0277-786X/14/$18 · doi: 10.1117/12.2072090

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

ix *Conference Committee*

SESSION 1 MODELING I

9071 02 **Comparison of IRST systems by SNR** [9071-1]
C. C. Kim, R. Meyer, Northrop Grumman Electronic Systems (United States)

9071 03 **Field of view selection for optimal airborne imaging sensor performance** [9071-2]
T. M. Goss, P. W. Barnard, ASELSAN South Africa (South Africa); H. Fildis, M. Erbudak, T. Senger, M. E. Alpman, ASELSAN Electronic Industries Inc. (Turkey)

9071 04 **Thermal imager sources of non-uniformities: modeling of static and dynamic contributions during operations** [9071-3]
B. Sozzi, M. Olivieri, P. Mariani, C. Giunti, S. Zatti, A. Porta, SELEX ES S.p.A. (Italy)

9071 05 **Comparing and contrasting different broadband MTF definitions and the relationship to range performance predictions** [9071-4]
J. G. Hixson, D. P. Haefner, B. Teaney, U.S. Army Night Vision & Electronic Sensors Directorate (United States)

9071 06 **Method for quantifying image quality in push-broom hyperspectral cameras** [9071-5]
G. Høye, T. Løke, A. Fridman, Norsk Elektro Optikk (Norway)

SESSION 2 MODELING II

9071 08 **An analysis of the performance trade space for multifunction EO-IR systems** [9071-7]
K. Krapels, U.S. Army Night Vision & Electronic Sensors Directorate (United States); R. Driggers, O. Furxhi, St. Johns Optical Systems (United States)

9071 09 **Observer analysis and its impact on task performance modeling** [9071-8]
E. L. Jacobs, J. B. Brown, The Univ. of Memphis (United States)

9071 0A **Lab and field measurements to evaluate a differential polarimetric IR (DPIR) search sensor** [9071-9]
R. Thompson Jr., K. Krapels, V. Hodgkin, B. Preece, K. Leonard, U.S. Army Night Vision & Electronic Sensors Directorate (United States); K. Gurton, U.S. Army Research Lab. (United States)

9071 0B **Modeling segmentation performance in NV-IPM** [9071-64]
M. J. Lies, E. L. Jacobs, J. B. Brown, The Univ. of Memphis (United States)

9071 0C **Predicted NETD performance of a polarized infrared imaging sensor** [9071-11]
B. Preece, V. Hodgkin, R. Thompson, K. Leonard, K. Krapels, U.S. Army Night Vision & Electronic Sensors Directorate (United States)

SESSION 3 MODELING III: ALGORITHMS

9071 0D **Technologies for low-bandwidth high-latency unmanned ground vehicle control** [9071-12]
T. Pace, K. Cogan, SenTech, LLC - A DSCI Co. (United States); L. Hunt, Prioria Robotics, Inc. (United States); P. Restine, SenTech, LLC - A DSCI Co. (United States)

9071 0E **High-dynamic range imaging using FAST-IR imagery** [9071-40]
F. Marcotte, V. Farley, Telops Inc. (Canada); M. Pauli, J. Auxier, U.S. Naval Research Lab. (United States); P. Tremblay, M. Chamberland, Telops Inc. (Canada)

9071 0F **A virtual environment for modeling and testing sensemaking with multisensor information** [9071-14]
D. Nicholson, K. Bartlett, R. Hoppenfeld, M. Nolan, S. Schatz, MESH Solutions, LLC – A DSCI Co. (United States)

9071 0G **Performance assessment of compressive sensing imaging** [9071-15]
T. W. Du Bosq, D. P. Haefner, B. L. Preece, U.S. Army Night Vision & Electronic Sensors Directorate (United States)

9071 0H **Low-cost computational imaging infrared sensor** [9071-16]
K. R. Bryant, U.S. Army Research, Development and Engineering Command (United States); W. D. Edwards, R. K. Rogers, Dynetics, Inc. (United States)

SESSION 4 MODELING IV: NIGHT VISION INTEGRATED PERFORMANCE MODEL

9071 0I **Color camera measurement and modeling for use in the Night Vision Integrated Performance Model (NV-IPM)** [9071-18]
D. P. Haefner, J. D. Fanning, B. P. Teaney, S. D. Burks, U.S. Army Night Vision & Electronic Sensors Directorate (United States)

9071 0J **Imaging system sensitivity analysis with NV-IPM** [9071-19]
J. Fanning, B. Teaney, U.S. Army Night Vision & Electronic Sensors Directorate (United States)

9071 0K **Modeling laser radar systems in the Night Vision Integrated Performance Model (NV-IPM)** [9071-20]
K. R. Leonard, V. Hodgkin, B. Preece, R. Thompson, K. Krapels, U.S. Army Night Vision & Electronic Sensors Directorate (United States)

SESSION 5 MODELING V

9071 0M **Modeling static and dynamic detection of humans in rural terrain** [9071-22]
E. Flug, U.S. Army Night Vision & Electronic Sensors Directorate (United States)

9071 0N **Uncertainty analysis of sensor performance parameters in the shortwave infrared spectral range based on nightglow as the main lightsource** [9071-23]
T. Svensson, D. Bergström, Swedish Defence Research Agency (Sweden)

9071 0O **A uniform method for analytically modeling mulit-target acquisition with independent networked imaging sensors** [9071-24]
M. Friedman, U.S. Army Night Vision & Electronic Sensors Directorate (United States)

9071 0P **SWIR range performance prediction for long-range applications** [9071-26]
E. Guadagnoli, P. Ventura, G. Barani, A. Porta, SELEX ES S.p.A. (Italy)

SESSION 6 TESTING I

9071 0Q **NIST traceable measurements of radiance and luminance levels of night-vision-goggle test-instruments** [9071-34]
G. P. Eppeldauer, V. B. Podobedov, National Institute of Standards and Technology (United States)

9071 0R **Methodology for lens transmission measurement in the 8-13 micron waveband: integrating sphere versus camera-based** [9071-27]
N. Schuster, J. Verplancke, B. Salethaiyan, J. Franks, Umicore Electro-Optic Materials (Belgium)

9071 0S **Modulation transfer function measurement of microbolometer focal plane array by Lloyd's mirror method** [9071-28]
G. Druart, S. Rommeluere, T. Viale, N. Guerineau, I. Ribet-Mohamed, ONERA (France); A. Crastes, A. Durand, ULIS (France); J. Taboury, Lab. Charles Fabry, CNRS, Institut d'Optique Graduate School (France)

9071 0T **Reporting NETD: why measurement techniques matter** [9071-29]
R. K. Rogers, W. D. Edwards, Dynetics, Inc. (United States); C. E. Waddle, C. L. Dobbins, S. B. Wood, U.S. Army Research, Development and Engineering Ctr. (United States)

9071 0U **Test equipment and methods to characterize fully assembled SWIR digital imaging systems** [9071-30]
J. Green, T. Robinson, Esterline Control and Communication Systems (United States)

9071 0V **Calibration of uncooled LWIR microbolometer imagers to enable long-term field deployment** [9071-31]
P. W. Nugent, J. A. Shaw, Montana State Univ. (United States)

SESSION 7 TESTING II

9071 0W **Spectral and angular responses of microbolometer IR FPA: a characterization method using a FTIR** [9071-32]
A. Touvignon, A. Durand, F. Romanens, J. Favreau, ULIS (France); O. Gravrand, CEA-LETI (France); C.-L. Tisse, ULIS (France)

9071 0X **NVLabCAP: an NVESD-developed software tool to determine EO system performance** [9071-33]
S. D. Burks, J. M. Doe, D. P. Haefner, B. P. Teaney, U.S. Army Night Vision & Electronic Sensors Directorate (United States)

9071 0Y **An alternate method for performing MRTD measurements** [9071-35]
A. Irwin, J. Grigor, Santa Barbara Infrared, Inc. (United States)

SESSION 8 TESTING III

9071 10 **Characterization of SWIR cameras by MRC measurements** [9071-37]
M. Gerken, H. Schlemmer, H. Haan, C. Siemens, M. Münzberg, Cassidian Optronics GmbH (Germany)

9071 11 **Wafer level test solutions for IR sensors** [9071-38]
S. Giessmann, F.-M. Werner, Cascade Microtech GmbH (Germany)

SESSION 9 SYSTEMS

9071 12 **Performance analysis of panoramic infrared systems** [9071-65]
O. Furxhi, R. G. Driggers, St. Johns Optical Systems (United States); G. Holst, JCD Publishing Co. (United States); K. Krapels, U.S. Army Night Vision & Electronic Sensors Directorate (United States)

SESSION 10 TARGETS, BACKGROUNDS, AND ATMOSPHERICS I

9071 13 **Evaluation of turbulence mitigation methods** [9071-41]
A. W. M. van Eekeren, TNO (Netherlands); C. S. Huebner, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany); J. Dijk, K. Schutte, P. B. W. Schwering, TNO (Netherlands)

9071 15 **Developing a broad spectrum atmospheric aerosol characterization for remote sensing platforms over desert regions** [9071-43]
S. B. Strong, A. M. Brown, Johns Hopkins Univ. (United States)

9071 17 **FTIR characterization of atmospheric fluctuations along slant paths** [9071-45]
C. A. Martin, D. M. Brown, M. E. Thomas, S. Strong, M. Lohr, Johns Hopkins Univ. (United States)

SESSION 11 TARGETS, BACKGROUNDS, AND ATMOSPHERICS II

9071 18 **Validation of atmospheric turbulence simulations of extended scenes** [9071-46]
K. R. Leonard, R. L. Espinola, U.S. Army Night Vision & Electronic Sensors Directorate (United States)

9071 19 **Aerosol MTF revisited** [9071-47]
N. S. Kopeika, A. Zilberman, Y. Yitzhaky, Ben-Gurion Univ. of the Negev (Israel)

9071 1A **DARPA super resolution vision system (SRVS) robust turbulence data collection and analysis** [9071-48]
R. L. Espinola, K. R. Leonard, R. Thompson, U.S. Army Night Vision & Electronic Sensors Directorate (United States); D. Tofsted, S. D'Arcy, U.S. Army Research Lab. (United States)

9071 1C **Three dimensional temperature estimation of a fire plume using multiple longwave infrared camera views** [9071-50]
M. B. Lohr, M. E. Thomas, T. M. Neighoff, D. T. Prendergast, A. G. Dress, S. T. Happel, K. M. Siegrist, Y. Chang, Johns Hopkins Univ. (United States)

SESSION 12 TECHNOLOGIES FOR SYNTHETIC ENVIRONMENTS: HARDWARE-IN-THE-LOOP

9071 1D **Development and evaluation of technologies for testing visible and infrared imaging sensors** [9071-52]
H. S. Lowry, S. L. Steely, W. J. Phillips, R. A. Nicholson, Aerospace Testing Alliance (United States)

9071 1E **Real-time scene and signature generation for ladar and imaging sensors** [9071-53]
L. Swierkowski, C. L. Christie, L. Antanovskii, E. Gouthas, Defence Science and Technology Organisation (Australia)

9071 1F **Real-time simulation of combined short-wave and long-wave infrared vision on a head-up display** [9071-55]
N. Peinecke, S. Schmerwitz, Deutsches Zentrum für Luft- und Raumfahrt e.V. (Germany)

9071 1H **Ultrahigh-temperature emitter pixel development for scene projectors** [9071-57]
K. Sparkman, J. LaVeigne, S. McHugh, Santa Barbara Infrared, Inc. (United States); J. Lannon, S. Goodwin, RTI International (United States)

9071 1I **Scalable emitter array development for infrared scene projector systems** [9071-58]
K. Sparkman, J. LaVeigne, S. McHugh, Santa Barbara Infrared, Inc. (United States); J. Kulick, Indiana Integrated Circuits, LLC (United States); J. Lannon, S. Goodwin, RTI International (United States)

POSTER SESSION

9071 1J **Background character research for synthetical performance of thermal imaging systems** [9071-60]
S. Chen, J. Wang, X. Wang, W. Jin, Beijing Institute of Technology (China)

9071 1K **Application of responsivity and noise evaluation method to infrared thermal imaging sensors** [9071-61]
D.-I. Kim, G. Kim, G.-H. Kim, K. S. Chang, Korea Basic Science Institute (Korea, Republic of)

9071 1L **WAHRSIS: a low-cost high-resolution whole sky imager with near-infrared capabilities** [9071-63]
S. Dev, Nanyang Technological Univ. (Singapore); F. M. Savoy, Univ. of Illinois at Urbana-Champaign (Singapore); Y. H. Lee, Nanyang Technological Univ. (Singapore); S. Winkler, Univ. of Illinois at Urbana-Champaign (Singapore)

Author Index

Conference Committee

Symposium Chair

David A. Whelan, Boeing Defense, Space, and Security (United States)

Symposium Co-chair

Nils R. Sandell Jr., Strategic Technology Office, DARPA (United States)

Conference Chairs

Gerald C. Holst, JCD Publishing Company (United States)
Keith A. Krapels, U.S. Army Night Vision & Electronic Sensors Directorate (United States)

Conference Program Committee

Gary H. Ballard, U.S. Army Research, Development and Engineering Command (United States)
Gisele Bennett, Georgia Institute of Technology (United States)
Piet Bijl, TNO Defence, Security and Safety (Netherlands)
James A. Buford Jr., U.S. Army Research, Development and Engineering Command (United States)
James A. Dawson, Dynetics, Inc. (United States)
Ronald G. Driggers, St. Johns Optical Systems (United States)
Richard L. Espinola, U.S. Army Night Vision & Electronic Sensors Directorate (United States)
David P. Forrai, L-3 Communications Cincinnati Electronics (United States)
Jonathan G. Hixson, U.S. Army Night Vision & Electronic Sensors Directorate (United States)
Alan Irwin, Santa Barbara Infrared, Inc. (United States)
Eddie L. Jacobs, University of Memphis (United States)
Terrence S. Lomheim, The Aerospace Corporation (United States)
R. Lee Murrer Jr., Millennium Engineering and Integration Company (United States)
Teresa L. Pace, SenTech, LLC- A DSCI Company (United States)
Hector M. Reyes, Raytheon Company (United States)
Endre Repasi, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany)
Joseph P. Reynolds, U.S. Army Night Vision & Electronic Sensors Directorate (United States)
Bernard M. Rosier, ONERA (France)
Michael A. Soel, FLIR Systems, Inc. (United States)

Curtis M. Webb, Northrop Grumman Electronic Systems (United States)

Session Chairs

1 Modeling I
Keith A. Krapels, U.S. Army Night Vision & Electronic Sensors Directorate (United States)
Gisele Bennett, Georgia Institute of Technology (United States)
Jonathan G. Hixson, U.S. Army Night Vision & Electronic Sensors Directorate (United States)

2 Modeling II
James A. Dawson, Dynetics, Inc. (United States)
Ronald G. Driggers, St. Johns Optical Systems (United States)
David P. Forrai, L-3 Communications Cincinnati Electronics (United States)

3 Modeling III: Algorithms
Eddie L. Jacobs, The University of Memphis (United States)
Terrence S. Lomheim, The Aerospace Corporation (United States)
Teresa L. Pace, SenTech, LLC- A DSCI Company (United States)

4 Modeling IV: Night Vision Integrated Performance Model
Hector M. Reyes, Raytheon Company (United States)
Joseph P. Reynolds, U.S. Army Night Vision & Electronic Sensors Directorate (United States)
Michael A. Soel, FLIR Systems, Inc. (United States)

5 Modeling V
Keith A. Krapels, U.S. Army Night Vision & Electronic Sensors Directorate (United States)
Gisele Bennett, Georgia Institute of Technology (United States)
Jonathan G. Hixson, U.S. Army Night Vision & Electronic Sensors Directorate (United States)

6 Testing I
Alan Irwin, Santa Barbara Infrared, Inc. (United States)
Curtis M. Webb, Northrop Grumman Electronic Systems (United States)

7 Testing II
Alan Irwin, Santa Barbara Infrared, Inc. (United States)
Curtis M. Webb, Northrop Grumman Electronic Systems (United States)

8 Testing III
Alan Irwin, Santa Barbara Infrared, Inc. (United States)
Curtis M. Webb, Northrop Grumman Electronic Systems (United States)

9 Systems
Alan Irwin, Santa Barbara Infrared, Inc. (United States)
Curtis M. Webb, Northrop Grumman Electronic Systems (United States)

10 Targets, Backgrounds, and Atmospherics I
Richard L. Espinola, U.S. Army Night Vision & Electronic Sensors Directorate (United States)
Endre Repasi, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany)
Bernard M. Rosier, ONERA (France)

11 Targets, Backgrounds, and Atmospherics II
Richard L. Espinola, U.S. Army Night Vision & Electronic Sensors Directorate (United States)
Endre Repasi, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany)
Bernard M. Rosier, ONERA (France)

12 Technologies for Synthetic Environments: Hardware-in-the-Loop
James A. Buford Jr., U.S. Army Research, Development and Engineering Command (United States)
R. Lee Murrer Jr., Millennium Engineering and Integration Company (United States)
Jeff Gareri, U.S. Army Research, Development and Engineering Command (United States)
