Volume 9081

Proceedings of SPIE 0277-786-786X, V.9081

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Laser Technology for Defense and Security X, edited by Mark Dubinskii,
Stephen G. Post, Proc. of SPIE Vol. 9081, 908101 · © 2014 SPIE
CCC code: 0277-786X/14/\$18 · doi: 10.1117/12.2074141

Proc. of SPIE Vol. 9081 908101-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Laser Technology for Defense and Security X*, edited by Mark Dubinskii, Stephen G. Post, Proceedings of SPIE Vol. 9081 (SPIE, Bellingham, WA, 2014) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/14/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

vii *Conference Committee*

SESSION 1 NOVEL LASER MATERIALS I

- 9081 03 **Processing and characterization of polycrystalline YAG (Yttrium Aluminum Garnet) core-clad fibers** [9081-2]
H. J. Kim, Air Force Research Lab. (United States) and UES, Inc. (United States); G. E. Fair, S. A. Potticary, M. J. O'Malley, N. G. Usechak, Air Force Research Lab. (United States)
- 9081 05 **Holmium-doped laser materials for eye-safe solid state laser application** [9081-4]
W. Kim, S. R. Bowman, C. Baker, G. Villalobos, B. Shaw, U.S. Naval Research Lab. (United States); B. Sadowski, Sotera Defense Solutions, Inc. (United States); M. Hunt, Univ. Research Foundation (United States); I. Aggarwal, Sotera Defense Solutions, Inc. (United States); J. Sanghera, U.S. Naval Research Lab. (United States)
- 9081 06 **Thermal properties of Er:Lu_xGd_{1-x}VO₄ crystals (Invited Paper)** [9081-5]
Z. Yan, H. Yu, H. Zhang, X. Han, C. Ma, J. Wang, Shandong Univ. (China)

SESSION 2 NOVEL LASER MATERIALS II

- 9081 09 **Compositional tuning of glass for the suppression of nonlinear and parasitic fiber laser phenomena** [9081-8]
P. D. Dragic, Univ. of Illinois at Urbana-Champaign (United States); J. Ballato, T. Hawkins, Clemson Univ. (United States)

SESSION 3 LASER SENSOR AND EYE PROTECTION; OTHER APPLICATIONS

- 9081 0A **Smart filters: protect from laser threats** [9081-9]
A. Donval, T. Fisher, O. Lipman, M. Oron, KiloLambda Technologies, Ltd. (Israel)
- 9081 0B **Characterization of the nonlinear optical properties of a photodegradation-resistant dye/solvent system** [9081-10]
T. M. Pritchett, M. J. Ferry, W. Shensky III, A. G. Mott, U.S. Army Research Lab. (United States); J. E. Haley, Air Force Research Lab. (United States)
- 9081 0D **Quantitative laser safety analysis for application of high-energy lasers in a field test** [9081-12]
D. Böker, C. Schwarz-Hemmert, D. Netzler, IABG mbH (Germany)

- 9081 OE **A laser-based FAIMS detector for detection of ultra-low concentrations of explosives** [9081-13]
A. E. Akmalov, A. A. Chistyakov, G. E. Kotkovskii, A. V. Sychev, A. V. Tugaenko, National Research Nuclear Univ. MEPhI (Russian Federation); A. S. Bogdanov, A. N. Perederiy, Moscow State Technical Univ. (Russian Federation); E. M. Spitsyn, POLYUS Research and Development Institute (Russian Federation)

SESSION 4 SINGLE-APERTURE POWER SCALING OF FIBER LASER (CW AND PULSED)

- 9081 OF **50 μ m-core Yb-doped leakage channel fiber with flattened mode** [9081-14]
F. Kong, G. Gu, T. W. Hawkins, J. Parsons, M. Jones, C. Dunn, M. T. Kalichevsky-Dong, Clemson Univ. (United States); K. Wei, B. Samson, Nufern (United States); L. Dong, Clemson Univ. (United States)
- 9081 OG **Highly reliable and efficient 1.5 μ m-fiber-MOPA-based, high-power laser transmitter for space communication** [9081-15]
D. Engin, V. Litvinovitch, F. Kimpel, K. Puffenberger, X. Dang, J.-L. Fouron, N. Martin, M. Storm, S. Gupta, R. Utano, Fibertek, Inc. (United States)
- 9081 OH **Thulium fiber laser and application development** [9081-16]
L. Shah, CREOL, The College of Optics and Photonics, Univ. of Central Florida (United States); C. Gaida, M. Gebhardt, Friedrich-Schiller-Univ. Jena (Germany); A. Sincore, J. B. Bradford, CREOL, The College of Optics and Photonics, Univ. of Central Florida (United States); N. Gehlich, Fraunhofer-Institut für Lasertechnik (Germany); I. Mingareev, CREOL, The College of Optics and Photonics, Univ. of Central Florida (United States) and Fraunhofer-Institut für Lasertechnik (Germany); M. Richardson, CREOL, The College of Optics and Photonics, Univ. of Central Florida (United States)
- 9081 OI **Resonant tandem pumping of Tm-doped fiber lasers** [9081-17]
D. Creeden, B. R. Johnson, G. A. Rines, S. D. Setzler, BAE Systems (United States)

SESSION 5 MID-IR LASER MATERIALS AND LASER DEVELOPMENT

- 9081 OO **Demonstration of a quick process to achieve buried heterostructure QCL leading to high power and wall plug efficiency** [9081-23]
W. Metaferia, KTH Royal Institute of Technology (Sweden); B. Simozrag, Thales Research & Technology (France); C. Junesand, KTH Royal Institute of Technology (Sweden) and Epiclarus AB (Sweden); Y.-T. Sun, KTH Royal Institute of Technology (Sweden); M. Carras, Thales Research & Technology (France); R. Blanchard, F. Capasso, Harvard Univ. (United States); S. Lourdudoss, KTH Royal Institute of Technology (Sweden)
- 9081 OP **High-performance mid-infrared GaSb laser diodes for defence and sensing applications** [9081-24]
A. Vizbaras, E. Dvinelis, A. Trinkūnas, I. Šimonytė, M. Greibus, M. Kaušylas, T. Žukauskas, R. Songaila, K. Vizbaras, Brolis Semiconductors UAB (Lithuania)

SESSION 6 FIBER LASERS: POWER SCALING VIA BEAM COMBINING

- 9081 0Q **Holographic phasing of fiber lasers: simple, scalable, broadband locking** [9081-25]
G. Andersen, K. MacDonald, P. Gelsinger-Austin, HUA, Inc. (United States)

SESSION 7 DIODE LASERS AND ADVANCED LASER COMPONENTS

- 9081 0U **Experimental verification of longitudinal spatial hole burning in high-power diode lasers** [9081-38]
T. Hao, J. Song, R. Liptak, P. O. Leisher, Rose-Hulman Institute of Technology (United States)
- 9081 0W **Current pulse investigation toward optimal pumping of a gain-switched asymmetric waveguide laser diode** [9081-30]
B. Lanz, J. T. Kostamovaara, Univ. of Oulu (Finland)
- 9081 0Y **Transverse mode selection in laser resonators using volume Bragg gratings** [9081-32]
B. Anderson, G. Venus, D. Ott, I. Divliansky, CREOL, The College of Optics and Photonics, Univ. of Central Florida (United States); J. W. Dawson, D. R. Drachenberg, M. J. Messerly, P. H. Pax, J. B. Tassano, Lawrence Livermore National Lab. (United States); L. Glebov, CREOL, The College of Optics and Photonics, Univ. of Central Florida (United States)

SESSION 8 BULK SOLID STATE LASERS: NOVEL DESIGNS

- 9081 10 **A high gain, composite Nd:YVO4/SiC thin disk amplifier** [9081-34]
G. A. Newburgh, M. Dubinskii, U.S. Army Research Lab. (United States)

POSTER SESSION

- 9081 12 **Highly-efficient high-energy pulse-burst Yb-doped fiber laser with transform limited linewidth** [9081-36]
D. Engin, I. Darab, J. Burton, J.-L. Fournon, F. Kimpel, B. Mathason, S. Gupta, M. Storm, Fibertek, Inc. (United States)

Author Index

Conference Committee

Symposium Chair

David A. Whelan, Boeing Defense, Space, and Security
(United States)

Symposium Co-chair

Nils R. Sandell Jr., Strategic Technology Office, DARPA (United States)

Conference Chairs

Mark Dubinskii, U.S. Army Research Laboratory (United States)
Stephen G. Post, Missile Defense Agency (United States)

Conference Program Committee

Steven R. Bowman, U.S. Naval Research Laboratory (United States)
Iyad Dajani, Air Force Research Laboratory (United States)
Fabio Di Teodoro, The Aerospace Corporation (United States)
Anthony M. Johnson, University of Maryland, Baltimore County
(United States)
Don D. Seeley, High Energy Laser Joint Technology Office
(United States)

Session Chairs

- 1 Novel Laser Materials I
George A. Newburgh, U.S. Army Research Laboratory (United States)
- 2 Novel Laser Materials II
Steven R. Bowman, U.S. Naval Research Laboratory (United States)
- 3 Laser Sensor and Eye Protection; Other Applications
Don D. Seeley, High Energy Laser Joint Technology Office
(United States)
- 4 Single-Aperture Power Scaling of Fiber Laser (CW and Pulsed)
Stephen G. Post, Missile Defense Agency (United States)
- 5 Mid-IR Laser Materials and Laser Development
Anthony M. Johnson, University of Maryland, Baltimore County
(United States)

- 6 Fiber Lasers: Power Scaling via Beam Combining
Mark Dubinskii, U.S. Army Research Laboratory (United States)
- 7 Diode Lasers and Advanced Laser Components
Stephen G. Post, Missile Defense Agency (United States)
- 8 Bulk Solid State Lasers: Novel Designs
Nikolay E. Ter-Gabrielyan, U.S. Army Research Laboratory
(United States)
