Part One of Two Parts

**Volume 9260**

Proceedings of SPIE 0277-786-786X, V.9260

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Land Surface Remote Sensing II, edited by Thomas J. Jackson, Jing Ming Chen, Peng Gong, Shunlin Liang,  
Proc. of SPIE Vol. 9260, 926001 · © 2014 SPIE · CCC code: 0277-786X/14/\$18 · doi: 10.1117/12.2179079

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Land Surface Remote Sensing II*, edited by Thomas J. Jackson, Jing Ming Chen, Peng Gong, Shunlin Liang, Proceedings of SPIE Vol. 9260 (SPIE, Bellingham, WA, 2014) Article CID Number.

---

**Paper Numbering:** Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print. Papers are published as they are submitted and meet publication criteria. A unique citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

xvii	<i>Conference Committee</i>

## Part One

<b>SESSION 1</b>	<b>VEGETATION AND CROPS</b>
9260 02	<b>Monitoring phenological stages of swiddening in northern Laos during the dry season [9260-1]</b>
9260 03	<b>Crop growth dynamics modeling using time-series satellite imagery [9260-163]</b>
9260 04	<b>Crop classification based on multi-temporal satellite remote sensing data for agro-advisory services [9260-3]</b>
9260 05	<b>Crop classification using multi-temporal HJ satellite images: case study in Kashgar, Xinjiang [9260-4]</b>
9260 06	<b>Inversion of a radiative transfer model for estimation of rice chlorophyll content using support vector machine [9260-5]</b>
<b>SESSION 2</b>	<b>URBAN</b>
9260 07	<b>Unsupervised building extraction using remote sensing data to detect changes in land use [9260-6]</b>
9260 0A	<b>Simulation of urban land surface temperature based on sub-pixel land cover in a coastal city [9260-10]</b>
<b>SESSION 3</b>	<b>SOIL MOISTURE ACTIVE PASSIVE (SMAP) MISSION</b>
9260 0D	<b>Passive/active microwave soil moisture retrieval disaggregation using SMAPVEX12 data [9260-13]</b>
<b>SESSION 4</b>	<b>SNOW</b>
9260 0L	<b>Determination of snow cover for the Tibetan Plateau (1983-1999) from NOAA-AVHRR LTDR [9260-21]</b>

---

**SESSION 5 SOIL MOISTURE I**

---

- 9260 0O **Inter-comparison of soil moisture products from SMOS, AMSR-E, ECWMF and GLDAS over the Mongolia Plateau** [9260-24]
- 9260 0P **Comparison between microwave coherent and incoherent scattering models for wetland vegetation in Poyang Lake area** [9260-25]
- 9260 0Q **Simulation of microwave brightness temperature over heterogeneous land surface using L-MEB model in HIWATER** [9260-26]
- 9260 0R **A new algorithm for phase transition water content retrieval during soil freeze-thaw process using microwave radiometer** [9260-27]

---

**SESSION 6 SOIL MOISTURE II**

---

- 9260 0S **Analysis of soil moisture retrieval from airborne passive/active L-band sensor measurements in SMAPVEX 2012** [9260-170]
- 9260 0T **Rough surface effects on active and passive microwave remote sensing of soil moisture at L-band using 3D fast solution of Maxwell's equations** [9260-29]
- 9260 0U **Soil moisture content inversion research using multi-source remote sensing data** [9260-30]
- 9260 0W **Co-location decision tree model for extracting exposed carbonate rocks in karst rocky desertification area** [9260-80]
- 9260 0X **Dual state-parameter estimation of land surface model through assimilating microwave brightness temperature** [9260-32]

---

**SESSION 7 LAND SURFACE TEMPERATURE**

---

- 9260 0Y **A novel interpolation method for MODIS land surface temperature data on the Tibetan Plateau** [9260-33]
- 9260 0Z **Time-series monitoring result of land surface temperature variation at Mt. Baekdu using Landsat images** [9260-34]
- 9260 11 **Production of large area LST products of HJ-1B IRS based on a fusion framework** [9260-35]
- 9260 13 **Estimate of land surface temperature from MTSAT-1R observations** [9260-37]
- 9260 15 **Land surface thermal environment during heat wave event measured by satellite observation** [9260-142]

<b>SESSION 8 SOILS</b>	
9260 17	<b>Soil aggregate stability and wind erodible fraction in a semi-arid environment of White Nile State, Sudan [9260-40]</b>
9260 18	<b>Angkor site monitoring and evaluation by radar remote sensing [9260-41]</b>
<b>SESSION 9 LAND SURFACE CHANGE AND SUBSIDENCE</b>	
9260 1C	<b>Small baseline subsets approach of DInSAR for investigating land surface deformation along the high-speed railway [9260-45]</b>
9260 1D	<b>A study of mining-induced subsidence in Hebi coalfield based on D-InSAR [9260-46]</b>
<b>SESSION 10 HYDROLOGIC VARIABLES AND STATES</b>	
9260 1G	<b>Estimation evapotranspiration over the large landscape by using remote sensing data [9260-50]</b>
9260 1H	<b>Detecting terrestrial water storage variations in northwest China by GRACE [9260-51]</b>
<b>SESSION 11 FORESTS</b>	
9260 1L	<b>A spectral index for highlighting forest cover from remotely sensed imagery [9260-105]</b>
9260 1M	<b>Monitoring expansion of plantations in Lao tropical forests using Landsat time series [9260-56]</b>
9260 1O	<b>The microwave emission and transmission characters of deciduous forest at L-band [9260-58]</b>
9260 1P	<b>Forest canopy growth dynamic modeling based on remote sensing products and meteorological data in Daxing'anling of Northeast China [9260-59]</b>
<b>SESSION 12 BIOMASS AND NPP</b>	
9260 1S	<b>A novel high resolution wide swath SAR based on waveform design [9260-150]</b>
9260 1T	<b>Multiscale geostatistical analysis of sampled above-ground biomass and vegetation index products from HJ-1A/B, Landsat, and MODIS [9260-62]</b>
9260 1V	<b>Mapping afforestation and forest biomass using time-series Landsat stacks [9260-65]</b>

---

**SESSION 13 LAND COVER AND CLIMATE CHANGE**

---

- 9260 21 **Satellite image time series clustering under collaborative principal component analysis** [9260-70]

---

**SESSION 14 LAND REMOTE SENSING TOPICS**

---

- 9260 22 **A target detection method with morphological knowledge for high-spatial resolution remote sensing image applying for search and rescue in aviation disaster** [9260-72]
- 9260 23 **A methodology to estimate representativeness of LAI station observation for validation: a case study with Chinese Ecosystem Research Network (CERN) *in situ* data** [9260-73]
- 9260 24 **LAND surface remote sensing Products VALIDation System (LAPVAS) and its preliminary application** [9260-74]

---

**POSTER SESSION**

---

- 9260 26 **A new method to inverse soil moisture based on thermal infrared and passive microwave remote sensing** [9260-28]
- 9260 28 **Variational level set segmentation for forest based on MCMC sampling** [9260-76]
- 9260 2C **A method for quickly extracting seismogeological hazards in Yingxiu, Sichuan Province, China** [9260-81]
- 9260 2G **Land surface phenology detection with multisource remote sensing data: a comparative analysis** [9260-85]
- 9260 2H **Trends of NDVI, precipitation and their relationship in different forest ecological zone of China during 1982 to 2006** [9260-86]

**Part Two**

- 9260 2I **Remote sensing change detection study based on adaptive threshold in pixel ratio method** [9260-87]
- 9260 2J **Simulation of regional rice growth by combination remote sensing data and crop model** [9260-88]
- 9260 2L **Winter wheat field transformation monitoring through remote sensing in Beijing suburb** [9260-90]
- 9260 2M **Spatio-temporal pattern of NPP and related analyses with terrain factors in Wuling mountainous area** [9260-91]
- 9260 2N **Estimate the soil moisture over semi-arid region of Loess Plateau using Radarsat-2 SAR data** [9260-92]

- 9260 2O **Analysis on vegetation changes of Maqu alpine wetlands in the Yellow River source region** [9260-94]
- 9260 2P **Dynamic changes of ecosystem service value of water conversation based on time series Landsat images** [9260-95]
- 9260 2Q **Study on interferometric combination for multi-temporal InSAR optimization** [9260-96]
- 9260 2R **Topographical effects of climate dataset and their impacts on the estimation of regional net primary productivity** [9260-97]
- 9260 2S **Study on soil erosion in Hudan River basin based on TM imagery** [9260-98]
- 9260 2U **Temporal and spatial analysis of vegetation coverage changes in Ordos area based on time series GIMMS-NDVI data** [9260-100]
- 9260 2V **Spectral data analysis of rock and mineral in Hatu Western Junggar Region, Xinjiang** [9260-101]
- 9260 2X **Estimating vegetation optical depth using L-band passive microwave airborne data in HiWATER** [9260-103]
- 9260 30 **Rural impervious surfaces extraction from Landsat 8 imagery and rural impervious surface index** [9260-107]
- 9260 32 **Integration of remote sensing (RS) and geographic information system (GIS) techniques for change detection of the land use and land cover (LULC) for soil management in the southern Port Said region, Egypt** [9260-109]
- 9260 33 **Analysis of light use efficiency and gross primary productivity based on remote sensing data over a phragmites-dominated wetland in Zhangye, China** [9260-110]
- 9260 34 **Assessment of ecological security in Changbai Mountain Area, China based on MODIS data and PSR model** [9260-112]
- 9260 35 **Comparison of analogous terrestrial and Martian drainage systems: a remote sensing based study** [9260-113]
- 9260 38 **A method for monitoring land-cover disturbance using satellite time series images** [9260-116]
- 9260 39 **Dynamic monitoring of lake based on HJ-CCD Images: a case study of Poyang Lake** [9260-117]
- 9260 3D **The dynamic monitoring of coal resources exploitation in the ecological function regionalization of Hulun Buir City based on remote sensing** [9260-121]
- 9260 3E **Comparison of Huanjing and Landsat satellite remote sensing of the spatial heterogeneity of Qinghai-Tibet alpine grassland** [9260-122]
- 9260 3G **Comparison of the sensor dependence of vegetation indices and vegetation water indices based on radiative transfer model** [9260-124]

- 9260 3H **Snow cover mapping over China using FY-2 and MTSAT-2 data** [9260-125]
- 9260 3I **Estimation of forest biomass by integrating ALOS PALSAR And HJ1B data** [9260-126]
- 9260 3N **Snow cover correlation between Mt. Villarrica and Mt. Liama in Chile** [9260-131]
- 9260 3P **Remote sensing albedo product validation over heterogenicity surface based on WSN: preliminary results and its uncertainty** [9260-133]
- 9260 3Q **Estimation of aboveground woody biomass using HJ-1 and Radarsat-2 data for deciduous forests in Daxing'anling, China** [9260-134]
- 9260 3R **Estimating the seasonal maximum light use efficiency** [9260-136]
- 9260 3S **A bag-of-visual-words model based framework for object-oriented land-cover classification** [9260-137]
- 9260 3T **Comparison of chemical analysis results of the Khangal River pollution with LandSat satellite data** [9260-138]
- 9260 3U **The relationship between vegetation supply water index and forest resource of Bogd Khaan Mountain in the Mongolia** [9260-139]
- 9260 3V **Change detection of polarimetric SAR images based on the KummerU Distribution** [9260-140]
- 9260 3W **A method of fast mosaic for massive UAV images** [9260-141]
- 9260 3X **Monitoring coastal land reclamation and land use change around Hangzhou Bay using Landsat dataset (1970s-2014)** [9260-143]
- 9260 3Y **Variability of change detection results for 2011 Tohoku, Japan earthquake using very high-resolution satellite images** [9260-145]
- 9260 4I **Analysis on the electromagnetic scattering properties of crops at multi-band** [9260-148]
- 9260 4J **Evaluation of the harmonic-analysis method for surface soil heat flux estimation: a case study in Heihe River Basin** [9260-151]
- 9260 4K **The propagation of VLF wave in layered earth-ionosphere waveguide** [9260-152]
- 9260 4L **Monitoring the carbon storage change in Tonghua City of Changbai mountain area** [9260-153]
- 9260 4M **A nearly real-time UAV video flow mosaic method** [9260-157]
- 9260 4N **The research by topographic correction methods of airborne hyperspectral remote sensing data based on DEM** [9260-158]
- 9260 4A **Digital Earth system based river basin data integration** [9260-160]

- 9260 4B **Fractional vegetation cover estimation over large regions using GF-1 satellite data**  
[9260-161]
- 9260 4D **Thermal anomaly before earthquake and damage assessment using remote sensing data for 2014 Yutian earthquake** [9260-165]
- 9260 4E **Eco-geological environment assessment of Datong Basin using satellite remote sensing**  
[9260-166]
- 9260 4G **Estimation of soil erosion in *Selenge and Darkhan* Provinces of Mongolia** [9260-168]
- 9260 4I **National level biomass database comparison for Mexico in relation to vegetation degradation stages** [9260-171]
- 9260 4K **Analysis between AMSR-E swath brightness temperature and snow cover area in winter time over Sierra Nevada, Western U.S.** [9260-173]
- 9260 4L **Three-dimensional range-gated flash LIDAR for land surface remote sensing** [9260-175]
- 9260 4N **Spatial distributing characteristics of land use in the southern slope of mid-Himalaya Mountains** [9260-177]

# Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

## Symposium Committees

### *Symposium Chairs*

**Upendra Singh**, NASA Langley Research Center (United States)

**Jiancheng Shi**, Institute of Remote Sensing Applications and Digital Earth (China)

### *Honorary Symposium Chairs*

**George Komar**, NASA Headquarters (United States)

**Toru Fukuda**, Japan Aerospace Exploration Agency (Japan)

**Deren Li**, Wuhan University (China)

**Shailesh R. Nayak**, Ministry of Earth Sciences (India)

**Guanhua Xu**, Former Minister of Science and Technology Department of China (China)

### *Symposium Co-chairs*

**Toshio Iguchi**, National Institute of Information and Communications Technology (Japan)

**A. S. Kiran Kumar**, Space Applications Center (India)

### *International Organizing and Technical Program Committee*

**Akimasa Sumi**, The University of Tokyo (Japan)

**Allen M. Larar**, NASA Langley Research Center (United States)

**Delu Pan**, The Second Institute of Oceanography, SOA (China)

**Haruhisa Shimoda**, Tokai University (Japan)

**Huadong Guo**, Institute of Remote Sensing and Digital Earth (China)

**Jiancheng Shi**, Institute of Remote Sensing and Digital Earth (China)

**Jing Ming Chen**, Nanjing University (China) and University of Toronto (Canada)

**Kazuhiro Asai**, Tohoku Institute of Technology (Japan)

**Kohei Mizutani**, National Institute of Information and Communications Technology (Japan)

**Peng Gong**, Tsinghua University (China)

**Peng Zhang**, China Meteorological Administration (China)

**Robert J. Frouin**, Scripps Institution of Oceanography (United States) and University of California, San Diego (United States)

**Shunlin Liang**, Beijing Normal University (China) and University of Maryland (United States)

**Thomas J. Jackson**, U. S. Department of Agriculture (United States)

**Tiruvalam N. Krishnamurti**, Florida State University (United States)  
**Toru Fukuda**, Japan Aerospace Exploration Agency (Japan)  
**Toshiyoshi Kimura**, Japan Aerospace Exploration Agency (Japan)  
**Upendra N. Singh**, NASA Langley Research Center (United States)  
**Xiaoxiong Xiong**, NASA Goddard Space Flight Center (United States)  
**Zhanqing Li**, Beijing Normal University (China) and University of  
Maryland, College Park (United States)  
**Guoqing Zhou**, Guilin University of Technology (China)

*Local Organizing Committee*

**Liangfu Chen**, Institute of Remote Sensing and Digital Earth (China)  
**Zifeng Wang**, Institute of Remote Sensing and Digital Earth (China)  
**Mingmei Chen**, Institute of Remote Sensing and Digital Earth (China)  
**Dandan Li**, Institute of Remote Sensing and Digital Earth (China)  
**Tianxing Wang**, Institute of Remote Sensing and Digital Earth (China)  
**Xiliang Ni**, Institute of Remote Sensing and Digital Earth (China)  
**Xiaofeng Yang**, Institute of Remote Sensing and Digital Earth (China)  
**Ying Zhang**, Institute of Remote Sensing and Digital Earth (China)  
**Tiantian Wang**, Institute of Remote Sensing and Digital Earth (China)  
**Xiaoying Ouyang**, Institute of Remote Sensing and Digital Earth  
(China)  
**Le Yang**, Institute of Remote Sensing and Digital Earth (China)  
**Man Peng**, Institute of Remote Sensing and Digital Earth (China)

# Conference Committee

## *Conference Chairs*

**Thomas J. Jackson**, U.S. Department of Agriculture (United States)

**Jing Ming Chen**, University of Toronto (Canada)

**Peng Gong**, Tsinghua University (China)

**Shunlin Liang**, University of Maryland, College Park (United States)

## *Conference Co-chairs*

**Koji Kajiwara**, Chiba University (Japan)

**Jiancheng Shi**, State Key Laboratory of Remote Sensing Science  
(China)

## *Conference Program Committee*

**Zhaoliang Li**, Institute of Agricultural Resources and Regional Planning  
(China)

**Jie Shan**, Purdue University (United States)

## *Session Chairs*

Vegetation and Crops

**Jing Ming Chen**, University of Toronto (Canada)

Urban

**Jie Shan**, Purdue University (United States)

Soil Moisture Active Passive (SMAP) Mission

**Tianjie Zhao**, Institute of Remote Sensing and Digital Earth (China)

Snow

**Andreas Colliander**, Jet Propulsion Laboratory (United States)

Soil Moisture I

**Peggy E. O'Neill**, NASA Goddard Space Flight Center (United States)

Soil Moisture II

**Venkat Lakshmi**, University of South Carolina (United States)

Soils

**Fulong Chen**, Institute of Remote Sensing and Digital Earth (China)

Land Surface Change and Subsidence

**Tianhe Chi**, Institute of Remote Sensing and Digital Earth (China)

Hydrologic Variables and States

**Li Jia**, Institute of Remote Sensing and Digital Earth (China)

Forests

**Shunlin Liang**, NOAA / NESDIS Office of Satellite Operations  
(United States)

Biomass and NPP

**Koji Kajiwara**, Chiba University (Japan)

Land Cover and Climate Change

**Huabing Huang**, Institute of Remote Sensing and Digital Earth (China)

Land Remote Sensing Topics

**Liangyun Liu**, Institute of Remote Sensing and Digital Earth (China)
