Volume 9333

Proceedings of SPIE, 1605-7422, V. 9333

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Biomedical Applications of Light Scattering IX, edited by Adam Wax, Vadim Backman, Proc. of SPIE
Vol. 9333, · © 2015 SPIE · CCC code: 1605-7422/15/\$18 · doi: 10.1117/12.2192728

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print. Papers are published as they are submitted and meet publication criteria. A unique citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

Contents

v *Authors*
vii *Conference Committee*

DYNAMIC LIGHT SCATTERING AND SPECKLE I

9333 02 **Robust estimation of vessel misfocus and real-time misfocus correction in laser speckle contrast imaging** [9333-2]

DYNAMIC LIGHT SCATTERING AND SPECKLE II

9333 04 **Detection of early seizures by diffuse optical tomography** [9333-4]

THEORY II

9333 0E **Investigation of the best model to characterize diffuse correlation spectroscopy measurements acquired directly on the brain** [9333-14]

9333 0F **Modeling scattering in turbid media using the Gegenbauer phase function** [9333-15]

NOVEL TECHNIQUES

9333 0N **Video-rate dual polarization multispectral endoscopic imaging** [9333-24]

9333 0O **Monte Carlo based investigation of Berry phase for depth resolved characterization of biomedical scattering samples** [9333-25]

LOW COHERENCE LIGHT SCATTERING

9333 0V **Efficient signal processing in spectroscopic optical coherence tomography** [9333-32]

POSTER SESSION

9333 0W **Analysis of water spread dynamics in human skin with near-infrared imaging** [9333-33]

9333 0Z **Computational hair quality categorization in lower magnifications** [9333-36]

9333 10 **Accuracy of experimental data and Monte Carlo simulation lookup table-based inverse models for assessment of turbid media optical properties with diffuse reflectance spectroscopy** [9333-37]

- 9333 12 **Scatterers shape effect on speckle patterns** [9333-39]
- 9333 13 **Numerical modeling of photon migration in the cerebral cortex of the living rat using the radiative transport equation** [9333-40]
- 9333 14 **Advanced Monte Carlo simulator of the polarization-sensitive optical coherence tomography systems** [9333-41]
- 9333 16 **Electric field Monte Carlo study of coherent complex light in turbid media** [9333-43]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

James G. Fujimoto, Massachusetts Institute of Technology
(United States)

R. Rox Anderson, Wellman Center for Photomedicine,
Massachusetts General Hospital (United States) and Harvard School
of Medicine (United States)

Program Track Chairs

Ammasi Periasamy, University of Virginia (United States)

Daniel L. Farkas, University of Southern California (United States)

Conference Chairs

Adam Wax, Duke University (United States)

Vadim Backman, Northwestern University (United States)

Conference Program Committee

Irving J. Bigio, Boston University (United States)

Stephen A. Boppart, University of Illinois at Urbana-Champaign
(United States)

Dirk J. Faber, Academisch Medisch Centrum (Netherlands)

Steven L. Jacques, Oregon Health & Science University
(United States)

Ofer Levi, University of Toronto (Canada)

Lev T. Perelman, Harvard University (United States)

Brian W. Pogue, Thayer School of Engineering at Dartmouth
(United States)

Bruce J. Tromberg, Beckman Laser Institute and Medical Clinic
(United States)

Session Chairs

- 1 Dynamic Light Scattering and Speckle I
Ofer Levi, University of Toronto (Canada)
- 2 Dynamic Light Scattering and Speckle II
Ofer Levi, University of Toronto (Canada)
- 3 Theory I
Vadim Backman, Northwestern University (United States)

- 4 Theory II
Lev T. Perelman, Harvard University (United States)
- 5 Cells and Tissues I
Adam Wax, Duke University (United States)
- 6 Cells and Tissues II
Adam Wax, Duke University (United States)
- 7 Novel Techniques
Dirk J. Faber, Academisch Medisch Centrum (Netherlands)
- 8 Low Coherence Light Scattering
Dirk J. Faber, Academisch Medisch Centrum (Netherlands)
