

PROCEEDINGS OF SPIE

Lidar Remote Sensing for Environmental Monitoring XV

Upendra N. Singh
Editor

12–13 August 2015
San Diego, California, United States

Sponsored and Published by
SPIE

Volume 9612

Proceedings of SPIE 0277-786X, V. 9612

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Lidar Remote Sensing for Environmental Monitoring XV, edited by
Upendra N. Singh, Proc. of SPIE Vol. 9612, 961201 · © 2015 SPIE
CCC code: 0277-786X/15/\$18 · doi: 10.1117/12.2218021

Proc. of SPIE Vol. 9612 961201-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this proceedings:

Author(s), "Title of Paper," in *Lidar Remote Sensing for Environmental Monitoring XV*, edited by Upendra N. Singh, Proceedings of SPIE Vol. 9612 (SPIE, Bellingham, WA, 2015) Six-digit Article CID Number.

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print. Papers are published as they are submitted and meet publication criteria. A unique citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

GREENHOUSE GASES TECHNOLOGIES, TECHNIQUES, AND MEASUREMENTS

- | | |
|---------|--|
| 9612 04 | Development of double- and tripled-pulsed 2-micron IPDA Lidars for column CO₂ measurement (Invited Paper) [9612-3] |
| 9612 05 | Optical parametric technology for methane measurements [9612-5] |

SPACE-BASED LASER/LIDAR DEVELOPMENT

- | | |
|---------|---|
| 9612 08 | Laser transmitter development for NASA's Global Ecosystem Dynamics Investigation (GEDI) lidar (Invited Paper) [9612-8] |
| 9612 09 | UV lifetime laser demonstrator for space-based applications [9612-9] |
| 9612 0A | The Cloud-Aerosol Transport System (CATS): a technology demonstration on the International Space Station (Invited Paper) [9612-10] |
| 9612 0B | Fiber-based, trace-gas, laser transmitter technology development for space [9612-11] |

LIDAR MEASUREMENTS

- | | |
|---------|---|
| 9612 0C | Lidar investigations of atmospheric dynamics (Invited Paper) [9612-12] |
| 9612 0D | Two-component wind fields from single scanning aerosol lidar [9612-13] |
| 9612 0E | Optical Autocovariance Wind Lidar (OAWL): aircraft test-flight history and current plans [9612-14] |

LIDAR INSTRUMENT AND COMPONENT TECHNOLOGIES

- | | |
|---------|--|
| 9612 0G | Comparison of aerosol backscatter and wind field estimates from the REAL and the SAMPLE [9612-16] |
|---------|--|

9612 0H **Performance characterization of a pressure-tuned wide-angle Michelson interferometric spectral filter for High Spectral Resolution Lidar** [9612-17]

9612 0I **Multi-wavelength high efficiency laser system for lidar applications** [9612-18]

POSTER SESSION

9612 0J **Parameterization of a geometrical reaction time model for two beam nacelle lidars**
[9612-19]

9612 0K **Sub-nanometer band pass coatings for LIDAR and astronomy** [9612-21]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Program Track Chair

Allen H.-L. Huang, University of Wisconsin-Madison (United States)

Conference Chair

Upendra N. Singh, NASA Langley Research Center (United States)

Conference Program Committee

Parminder Ghuman, NASA Goddard Space Flight Center
(United States)

Floyd E. Hovis, Fibertek, Inc. (United States)

Yongxiang Hu, NASA Langley Research Center (United States)

George J. Komar, NASA Headquarters (United States)

Kohei Mizutani, National Institute of Information and Communications
Technology (Japan)

Jirong Yu, NASA Langley Research Center (United States)

Session Chairs

- 1 Keynote Session
Parminder Ghuman, NASA Goddard Space Flight Center
(United States)
- 2 Greenhouse Gases Technologies, Techniques, and Measurements
George J. Komar, NASA Headquarters (United States)
Upendra N. Singh, NASA Langley Research Center (United States)
- 3 Space-based Laser/Lidar Development
Parminder Ghuman, NASA Goddard Space Flight Center
(United States)
Floyd E. Hovis, Fibertek, Inc. (United States)
- 4 Lidar Measurements
Upendra N. Singh, NASA Langley Research Center (United States)
George J. Komar, NASA Headquarters (United States)
- 5 Lidar Instrument and Component Technologies
Floyd E. Hovis, Fibertek, Inc. (United States)
Shibin Jiang, AdValue Photonics, Inc. (United States)
