**16–18 April 2018  
Orlando, Florida, United States**

*Sponsored and Published by*  
SPIE

**Volume 10628**

Proceedings of SPIE 0277-786X, V. 10628

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Detection and Sensing of Mines, Explosive Objects, and Obscured Targets XXIII  
edited by Steven S. Bishop, Jason C. Isaacs, Proc. of SPIE Vol. 10628, 1062801  
© 2018 SPIE · CCC code: 0277-786X/18/\$18 · doi: 10.1117/12.2322389

Proc. of SPIE Vol. 10628 1062801-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Detection and Sensing of Mines, Explosive Objects, and Obscured Targets XXIII*, edited by Steven S. Bishop, Jason C. Isaacs, Proceedings of SPIE Vol. 10628 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii *Authors*  
ix *Conference Committee*

---

## **SESSION 1      SENSING MÉLANGE**

---

- 10628 02      **Thermal remote sensing approach combined with field spectroscopy for detecting underground structures intended for defence and security purposes in Cyprus (Invited Paper)** [10628-1]
- 10628 03      **Inside-the-wall detection of objects with low metal content using the GPR sensor: effects of different wall structures on the detection performance** [10628-2]
- 10628 04      **Laser multi-beam differential interferometric sensor for acoustic detection of buried objects** [10628-3]
- 10628 06      **Forensic database of homemade and nonstandard explosives** [10628-5]

---

## **SESSION 2      DOWNWARD LOOKING GPR SENSING I**

---

- 10628 08      **A validation study of the simulation software gprMax by varying antenna stand-off height** [10628-7]
- 10628 09      **A GPR-based landmine identification method using energy and dielectric features** [10628-8]
- 10628 0A      **Scene analysis using semi-supervised clustering** [10628-9]
- 10628 0B      **Standardized Down-Looking Ground-Penetrating Radar (DLGPR) data collections** [10628-10]

---

## **SESSION 3      DOWNWARD LOOKING GPR SENSING II**

---

- 10628 0C      **How do we choose the best model? The impact of cross-validation design on model evaluation for buried threat detection in ground penetrating radar** [10628-11]
- 10628 0D      **Improving the histogram of oriented gradient feature for threat detection in ground penetrating radar by implementing it as a trainable convolutional neural network** [10628-12]
- 10628 0E      **How much shape information is enough, or too much? Designing imaging descriptors for threat detection in ground penetrating radar data** [10628-13]

10628 OF **If training data appears to be mislabeled, should we relabel it? Improving supervised learning algorithms for threat detection in ground penetrating radar data** [10628-14]

10628 OG **Comparison of several single and multiple instance learning methods for detecting buried explosive objects using GPR data** [10628-15]

---

**SESSION 4 FORWARD LOOKING SENSING**

---

10628 OH **Novel application of windowed beamforming function imaging for FLGPR** [10628-16]

10628 OI **Comparison of experimental three-band IR detection of buried objects and multiphysics simulations** [10628-17]

---

**SESSION 5 UXO ELECTROMAGNETIC INDUCTION SENSING AND CLEARANCE**

---

10628 OJ **UXO clearance operation in Laos** [10628-23]

10628 OK **Short and long wire detection using high-frequency electromagnetic induction techniques** [10628-24]

10628 OL **Accounting for the influence of salt water in the physics required for processing underwater UXO EMI signals** [10628-25]

10628 OM **Exploiting measurement subspaces for wideband electromagnetic induction processing** [10628-26]

10628 ON **EMI real-time subsurface target location by analytical dHP** [10628-27]

10628 OO **High frequency EMI sensing for estimating depleted uranium radiation levels in soil** [10628-28]

---

**SESSION 6 EMI SENSING I**

---

10628 OP **Modeling the broadband electromagnetic induction response of three-dimensional targets** [10628-29]

10628 OQ **Optimization, analysis, and comparison of coils for EMI systems** [10628-30]

---

**SESSION 7 EMI SENSING II**

---

10628 OR **Cramer-Rao analysis of unknown target parameters in electromagnetic induction data** [10628-31]

10628 0S **EMPACT 3D: an advanced EMI discrimination sensor for CONUS and OCONUS applications**  
[10628-32]

---

**SESSION 8 EMI, GPR, AND APPLIED DEEP LEARNING TECHNIQUES**

---

10628 0T **Generative adversarial networks for ground penetrating radar in hand held explosive hazard detection** [10628-33]

10628 0U **Sample spacing variations on the features performance for subsurface object detection using handheld ground penetrating radar (Rising Researcher Paper)** [10628-34]

10628 0V **Introduction of the advanced ALIS: Advanced Landmine Imaging System** [10628-35]

10628 0W **Interpolation of non-uniformly sampled handheld radar data for visualization and algorithm development** [10628-36]

---

**SESSION 9 SYNTHETIC APERTURE SONAR (SAS) I**

---

10628 0Y **Opto-acoustic intensity probes for fused video and vector acoustics measurements in undersea monitoring** [10628-18]

10628 0Z **A fast target detection algorithm for underwater synthetic aperture sonar imagery** [10628-19]

10628 10 **Fractal analysis of seafloor textures for target detection in synthetic aperture sonar imagery**  
[10628-20]

10628 11 **Comparison of prescreening algorithms for target detection in synthetic aperture sonar imagery** [10628-21]

10628 12 **Possibilistic fuzzy local information C-means with automated feature selection for seafloor segmentation** [10628-22]

---

**SESSION 10 SIDE-ATTACK THREAT SENSING I**

---

10628 13 **Program update for standoff detection of roadside hazards** [10628-38]

10628 14 **Analyzing three-dimensional radar voxel data using the discrete Fourier transform for SAEH detection** [10628-39]

10628 15 **Physics-based data augmentation for high frequency 3D radar systems** [10628-41]

10628 16 **High-resolution MIMO X-band radar for side-looking anomaly detection** [10628-42]

10628 17 **Detecting explosive hazards in 3D radar imaging through clustering and sequential learning**  
[10628-53]

10628 18 **Confidence level estimation in multi-target classification problems** [10628-56]

---

**SESSION 11 SYNTHETIC APERTURE SONAR (SAS) II**

---

10628 19 **Quantitative evaluation metrics for superpixel clustering** [10628-44]

10628 1A **Estimation of automatic target recognition performance for synthetic aperture sonar with integration angle reduction** [10628-45]

---

**SESSION 12 SYNTHETIC APERTURE SONAR (SAS) III**

---

10628 1E **Position dependent frequency correlations for object identification in 3-dimensional signals of ultra-wideband radar** [10628-49]

---

**SESSION 13 SIDE-ATTACK THREAT SENSING II**

---

10628 1H **Convolutional neural network based side attack explosive hazard detection in three dimensional voxel radar** [10628-51]

10628 1I **Backscattering strip-mapped synthetic aperture air acoustic array experiments for imaging a ground canonical target through a hexagonal rod array of clutter** [10628-54]

10628 1J **High bandwidth acoustic detection system (HBADS) for strip map synthetic aperture acoustic imaging of canonical ground targets using airborne sound and a 16-element receiving array** [10628-55]

---

**POSTER SESSION**

---

10628 1K **Permittivity and conductivity parameter estimations using full waveform inversion** [10628-57]

## Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

# Conference Committee

## *Symposium Chair*

**Arthur A. Morrish**, Raytheon Space and Airborne Systems  
(United States)

## *Symposium Co-chair*

**Ruth L. Moser**, Air Force Research Laboratory (United States)

## *Conference Chairs*

**Steven S. Bishop**, U.S. Army Night Vision & Electronic Sensors  
Directorate (United States)

**Jason C. Isaacs**, Naval Surface Warfare Center Panama City Division  
(United States)

## *Conference Program Committee*

**Canicious G. Abeynayake**, Defence Science and Technology Group  
(Australia)

**Derek T. Anderson**, Mississippi State University (United States)

**Benjamin E. Barrowes**, U.S. Army Engineer Research and  
Development Center (United States)

**Leslie M. Collins**, Duke University (United States)

**Anthony A. Faust**, Defence Research and Development Canada,  
Suffield (Canada)

**Tesfaye G-Michael**, Naval Surface Warfare Center Panama City  
Division (United States)

**Pete Howard**, U.S. Army CERDEC NVESD (United States)

**James M. Keller**, University of Missouri-Columbia (United States)

**Aaron LaPointe**, U.S. Army Night Vision & Electronic Sensors  
Directorate (United States)

**Henric Östmark**, Swedish Defence Research Agency (Sweden)

**Motoyuki Sato**, Tohoku University (Japan)

**Waymond R. Scott Jr.**, Georgia Institute of Technology (United States)

**Alina Zare**, University of Florida (United States)

## Session Chairs

- 1 Sensing Mélange  
**Steven S. Bishop**, U.S. Army Night Vision & Electronic Sensors  
Directorate (United States)  
**Jason C. Isaacs**, Naval Surface Warfare Center Panama City Div.  
(United States)
- 2 Downward Looking GPR Sensing I  
**Leslie M. Collins**, Duke University (United States)  
**Sai L. Chiang**, U.S. Army Night Vision & Electronic Sensors Directorate  
(United States)
- 3 Downward Looking GPR Sensing II  
**Canicious G. Abeynayake**, Defence Science and Technology Group  
(Australia)  
**Brian C. Barlow**, U.S. Army Night Vision & Electronic Sensors  
Directorate (United States)
- 4 Forward Looking Sensing  
**Anthony A. Faust**, Defence Research and Development Canada,  
Suffield (Canada)  
**Neal E. Blackwell**, U.S. Army Night Vision & Electronic Sensors  
Directorate (United States)
- 5 UXO Electromagnetic Induction Sensing and Clearance  
**Waymond R. Scott Jr.**, Georgia Institute of Technology (United States)  
**Frank Navish III**, U.S. Army Night Vision & Electronic Sensors  
Directorate (United States)
- 6 EMI Sensing I  
**Motoyuki Sato**, Tohoku University (Japan)  
**Ken E. Yasuda**, U.S. Army RDECOM CERDEC NVESD (United States)
- 7 EMI Sensing II  
**Motoyuki Sato**, Tohoku University (Japan)  
**Ken E. Yasuda**, U.S. Army RDECOM CERDEC NVESD (United States)
- 8 EMI, GPR, and Applied Deep Learning Techniques  
**Aaron LaPointe**, U.S. Army Night Vision & Electronic Sensors  
Directorate (United States)  
**Ken E. Yasuda**, U.S. Army RDECOM CERDEC NVESD (United States)
- 9 Synthetic Aperture Sonar (SAS) I  
**Derek T. Anderson**, Mississippi State University (United States)  
**Robert H. Luke III**, U.S. Army Night Vision & Electronic Sensors  
Directorate (United States)

- 10 Side-attack Threat Sensing I  
**Tesfaye G-Michael**, Naval Surface Warfare Center Panama City Div.  
(United States)  
**Brian C. Barlow**, U.S. Army Night Vision & Electronic Sensors  
Directorate (United States)
- 11 Synthetic Aperture Sonar (SAS) II  
**James M. Keller**, University of Missouri (United States)  
**Peter D. Howard**, U.S. Army Night Vision & Electronic Sensors  
Directorate (United States)
- 12 Synthetic Aperture Sonar (SAS) III  
**Alina Zare**, University of Florida (United States)  
**Peter D. Howard**, U.S. Army Night Vision & Electronic Sensors  
Directorate (United States)
- 13 Side-attack Threat Sensing II  
**Jason C. Isaacs**, Naval Surface Warfare Center Panama City Div.  
(United States)  
**Kathryn Williams**, U.S. Army RDECOM CERDEC NVESD (United States)
