Volume 11543

Proceedings of SPIE 0277-786X, V. 11543

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Artificial Intelligence and Machine Learning in Defense Applications II, edited by
Judith Dijk, Proc. of SPIE Vol. 11543, 1154301 · © 2020 SPIE
CCC code: 0277-786X/20/\$21 · doi: 10.1117/12.2584651

Proc. of SPIE Vol. 11543 1154301-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Artificial Intelligence and Machine Learning in Defense Applications II*, edited by Judith Dijk, Proceedings of SPIE Vol. 11543 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

TURBULENCE MITIGATION

- 11543 03 **Analysis of deep learning architectures for turbulence mitigation in long-range imagery (Invited Paper)** [11543-1]
- 11543 04 **Fast algorithms for model-based imaging through turbulence** [11543-2]

MARITIME APPLICATIONS

- 11543 05 **A comprehensive analysis of modern object detection methods for maritime vessel detection (Invited Paper)** [11543-3]
- 11543 06 **CNN-based object detection and segmentation for maritime domain awareness** [11543-4]
- 11543 07 **Faster-RCNN with a compact CNN backbone for target detection in infrared images** [11543-5]
- 11543 08 **Analysis of different tracking algorithms applied on thermal infrared imagery for maritime surveillance systems** [11543-6]
- 11543 09 **Deep learning for automatic target recognition with real and synthetic infrared maritime imagery** [11543-7]
- 11543 0A **Development of a method for automatic generation and optimization of fuzzy controller parameters using genetic algorithm** [11543-23]
- 11543 0B **Long-range person and vehicle detection** [11543-24]

NAVIGATION

- 11543 0D **Vision communication and vision navigation method for UAV bionic flight** [11543-9]
- 11543 0F **Adversarial patch camouflage against aerial detection (Invited Paper)** [11543-11]
- 11543 0G **Investigating robustness of adversarial camouflage (AC) for naval vessels** [11543-12]

HUMAN-ROBOT COLLABORATION

- 11543 OI **A multitask model for person re-identification and attribute recognition using semantic regions** [11543-14]
- 11543 OJ **Optimal control under communication constraints for multi-agent unmanned vehicles** [11543-15]
- 11543 OL **Heterogeneous neuromorphic processor based on RISC-V architecture for real-time robotics tasks** [11543-17]
- 11543 OM **Unsupervised behaviour anomaly detection from fixed camera full motion video** [11543-22]

POSTER SESSION

- 11543 OO **Image domain adaption of simulated data for human pose estimation** [11543-19]
- 11543 OP **A deep learning approach to crack detection on road surfaces** [11543-20]
- 11543 OR **Very large multimodal multi-architecture convolutional neural network with bundled transfer learning for automated coronavirus diagnosis** [11543-25]
- 11543 OS **Interpretable deep learning-based risk evaluation approach** [11543-27]
