

PROCEEDINGS OF SPIE

***Optics Frontiers Online 2020:
Optical Communications
and Networks***

Ming Tang
Editor

24–25 July 2020
Online Only, China

Organized by
Chinese Laser Press (China)

Published by
SPIE

Volume 11604

Proceedings of SPIE 0277-786X, V. 11604

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Optics Frontiers Online 2020: Optical Communications and Networks, edited by
Ming Tang, Proc. of SPIE Vol. OPC100, OPC10000 · © 2020 SPIE
CCC code: 0277-786X/20/\$21 · doi: 10.1117/12.2588279

Proc. of SPIE Vol. OPC100 1160401-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optics Frontiers Online 2020: Optical Communications and Networks*, edited by Ming Tang, Proceedings of SPIE Vol. 11604 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

OPTICS FRONTIERS ONLINE 2020: OPTICAL COMMUNICATIONS AND NETWORKS

11604 02	Performance simulation and analysis of space-ground FSO communication system [11604-1]
11604 03	Research on a device of eliminating stray light in transceiver of laser communication [11604-2]
11604 04	Generation and modulation of Airy beam through quasi-phase-matched Pockels effect [11604-4]
11604 05	Experimental research on pulse error correction technology of laser command guidance communication system [11604-5]
11604 06	Research on the light field modulation technology of the laser-beam riding guidance system [11604-6]
11604 07	Photonic scheme for generating 12-tupling frequency mm-wave signal based on SOA-FWM [11604-7]
11604 08	Progress and challenges of optical wireless mine communication and localization [11604-8]
11604 09	Cutting-edge development for vehicle free space optical communication in 5G evolution [11604-11]
11604 0A	Advances of wireless optical relay communication [11604-13]
11604 0B	Beam splitter of vector vortex beam using S-waveplate [11604-14]
11604 0C	Lattice reduction precoding for underwater optical imaging MIMO system [11604-15]
11604 0D	A method for removing spurious fringes based on characteristic spectrum band-stop filter [11604-16]
11604 0E	Performance improvement of multi-carrierless amplitude and phase modulation based visible light communication system using fractionally spaced equalizer [11604-18]
11604 0F	Measurement of second-order dispersion fluctuation of fiber grating based on optical phase modulator [11604-19]
11604 0G	Blind adaptive degenerated look-up table based perturbative nonlinear compensation for 16QAM probabilistically shaped signals [11604-20]
11604 0H	1 × N-channel optical switch based on optical waveguide array and MEMS micromirror [11604-22]

- 11604 OI **M²-factor and wander of Mathieu Gaussian-Schell beam in oceanic turbulence** [11604-23]
- 11604 OJ **Second harmonic generation by the silicon Mach-Zehnder modulator with symmetric arm** [11604-24]
- 11604 OK **Time-domain blind ICI compensation for CO-FBMC/OQAM system** [11604-26]
- 11604 OL **The research and application of optical logic "NOT" gate operation system based on time lens imaging** [11604-29]
- 11604 OM **Design of a CWDM4 single fiber bidirectional transceiving module based on hybrid integration** [11604-33]
