Volume 11972

Proceedings of SPIE, 1605-7422, V. 11972

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Label-free Biomedical Imaging and Sensing (LBIS) 2022, edited by Natan T. Shaked, Oliver Hayden,
Proc. of SPIE Vol. 11972, 1197201 · © 2022 SPIE · 1605-7422 · doi: 10.1117/12.2634767

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Label-free Biomedical Imaging and Sensing (LBIS) 2022*, edited by Natan T. Shaked, Oliver Hayden, Proc. of SPIE 11972, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

MULTISPECTRAL IMAGING

- 11972 02 **Label-free assessment of Panc-1 cells viability and changes in metabolic fluorophores followed by radiodynamic therapy (RDT)** [11972-1]
- 11972 03 **A portable, dual-channel oblique back-illumination capillaroscope for in vivo human blood cell imaging in hematology clinics** [11972-3]

NONLINEAR AND MULTIPHOTON IMAGING

- 11972 04 **Feasibility of non-imaging, random-sampling second harmonic generation measurements to distinguish colon cancer** [11972-4]

SPECTROSCOPY AND SCATTERING

- 11972 05 **Monitoring the efficacy of chemotherapeutic drugs using dark field imaging** [11972-13]

AUTOFLUORESCENCE I

- 11972 06 **Modeling key metabolic pathways of cancer cells using label-free fluorescence lifetime imaging** [11972-54]
- 11972 07 **Measuring variations in optical imaging markers in a glial cell-directed mouse model of human MEN1 syndrome (Invited Paper)** [11972-55]

OCT AND INTERFEROMETRY II

- 11972 08 **Label-free assessment of renal function with unilateral ureteral obstruction (UUO) model by optical coherence microscopy** [11972-30]

PHASE IMAGING III

- 11972 09 **Label-free identification and quantification of nanoparticles in single cells by combining digital holographic microscopy and mass spectrometry** [11972-46]
- 11972 0A **Detection of apoptotic and necrotic cell death using holographic microscopy** [11972-45]
- 11972 0B **Quantitative volume comparisons of methamphetamine-induced apoptosis by simultaneous digital holographic microscopy and transport of intensity phase-imaging techniques** [11972-47]
- 11972 0C **Label-free imaging of live migrasome formation using optical diffraction tomography** [11972-49]

PLASMONICS AND BIOSENSORS I

- 11972 0D **Imaging and sensing in the nIR using fluorescent single-walled carbon nanotubes (Invited Paper)** [11972-19]
- 11972 0E **Functionalization of a photonic crystal biosensor with modified aptamers for the detection of cardiac biomarkers** [11972-22]

PLASMONICS AND BIOSENSORS II

- 11972 0F **Label-free cellphone microscopy with submicron resolution through high-index contact ball lens for in vivo melanoma diagnostics and other applications** [11972-24]

POSTER SESSION

- 11972 0G **Development of advanced sensing materials and interface structures for in-situ bioellipsometry** [11972-62]

Conference Committee

Symposium Chairs

Jennifer K. Barton, The University of Arizona (United States)
Wolfgang Drexler, Medizinische University Wien (Austria)

Program Track Chairs

Ammasi Periasamy, University of Virginia (United States)
Daniel L. Farkas, University of Southern California (United States) and SMI
(United States)

Conference Chairs

Natan T. Shaked, Tel Aviv University (Israel)
Oliver Hayden, Technische University München (Germany)

Conference Program Committee

Shi-Wei Chu, National Taiwan University (Taiwan)
Adam de la Zerda, Stanford University School of Medicine (United States)
Pietro Ferraro, Istituto di Scienze Applicate e Sistemi Intelligenti "Eduardo
Caianiello" (Italy)
Jochen R. Guck, TU Dresden (Germany)
Bahram Jalali, University of California, Los Angeles (United States)
Alexander T. Khmaladze, University at Albany (United States)
Pierre P. Marquet, Center de Recherche de l'Univ. Laval Robert-Giffard
(Canada)
Jürgen Popp, Friedrich-Schiller-Univ. Jena (Germany)
Francisco E. Robles, Georgia Institute of Technology & Emory University
School of Medicine (United States)
Melissa C. Skala, University of Wisconsin-Madison (United States)
Valery V. Tuchin, Saratov State University (Russian Federation) and Tomsk
State University (Russian Federation) and Institute of Precision
Mechanics and Control of the RAS (Russian Federation)
Yihui Wu, Changchun Institute of Optics, Fine Mechanics and Physics
(China)
Yizheng Zhu, Virginia Polytechnic Institute and State University
(United States)
