

PROCEEDINGS OF SPIE

AOPC 2022: Novel Optical Design; and Optics Ultra Precision Manufacturing and Testing

**Lingbao Kong
Dawei Zhang
Zexin Feng**
Editors

**18–19 December 2022
ONLINE, China**

Sponsored by
Chinese Society for Optical Engineering (CSOE) (China)

Technical Sponsor
SPIE

Organized by
Tianjin University (China)
University of Electronic Science and Technology of China (China)
Nanjing University of Science and Technology (China)
Beijing Institute of Space Mechanics and Electricity (China)
Science and Technology on Low-light-level Night Vision Laboratory (China)
Science and Technology on Electro-Optical Information Security Control (China)

SPIE

Volume 12559

Proceedings of SPIE 0277-786X, V. 12559

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

AOPC 2022: Novel Optical Design; and Optics Ultra Precision Manufacturing and Testing,
edited by Lingbao Kong, Dawei Zhang, Zexin Feng, Proc. of SPIE Vol. 12559,
1255901 · © 2023 SPIE · 0277-786X · doi: 10.1117/12.2670270

Proc. of SPIE Vol. 12559 1255901-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *AOPC 2022: Novel Optical Design; and Optics Ultra Precision Manufacturing and Testing*, edited by Lingbao Kong, Dawei Zhang, Zexin Feng, Proc. of SPIE 12559, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

OPTICS ULTRA PRECISION MANUFACTURING AND TESTING

- 12559 02 **A high precision transverse distortion measurement based on interference fringe pattern analysis [12559-1]**
- 12559 03 **Technology for subsurface damages detection of optical components based on various fluorescent material [12559-2]**
- 12559 04 **Development of high-performanced 50nm bandwidth rectangular wave filter [12559-3]**
- 12559 05 **Analysis and detection of optical path error of large aperture plane mirror [12559-6]**
- 12559 06 **Computer-aided alignment method based on deep learning [12559-8]**
- 12559 07 **Research on wear passivation law for diamond grinding wheel based on acoustic emission [12559-9]**
- 12559 08 **Research on the influence of stations layout of multilateration measurement system on coordinate measurement accuracy [12559-10]**
- 12559 09 **Numerical calculation for thermal effect of polycarbosilane composite coating irradiated by continuous-wave laser [12559-11]**

NOVEL OPTICAL DESIGN

- 12559 0A **Design and imaging simulation of annular microchannel optics [12559-12]**
- 12559 0B **Design and exploration of freeform three-mirror imaging systems with integrated primary and tertiary mirrors using same expression [12559-13]**
- 12559 0C **Design of large field of view multi-spectral off-axis three-mirror reflective optical system [12559-14]**
- 12559 0D **Design of off-axis mirror system for ultra-long exit pupil distance space laser communication terminal [12559-15]**

- 12559 0E **Design of large aperture and large field of view receiving optical system based on catadioptric system [12559-16]**
- 12559 0F **Fast irradiance evaluation of freeform illumination lenses based on deep learning [12559-17]**
- 12559 0G **Design of variable baseline optical system for 3D imaging [12559-18]**

Conference Committee

Conference Chairs

Lingbao Kong, Fudan University (China)

Dawei Zhang, University of Shanghai for Science and Technology
(China)

Zexin Feng, Beijing Institute of Technology (China)

Program Committee

Xianglong Mao, Xi'an Institute of Optics and Precision Mechanics,
Chinese Academy of Sciences (China)

Huazhong Xiang, University of Shanghai for Science and Technology
(China)

Kun Wang, Fujian Normal University (China)
