Volume 12623

Proceedings of SPIE 0277-786X, V. 12623

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Automated Visual Inspection and Machine Vision V, edited by Jürgen Beyerer,
Michael Heizmann, Proc. of SPIE Vol. 12623, 1262301
© 2023 SPIE · 0277-786X · doi: 10.1117/12.3007300

Proc. of SPIE Vol. 12623 1262301-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Automated Visual Inspection and Machine Vision V*, edited by Jürgen Beyerer, Michael Heizmann, Proc. of SPIE 12623, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

SESSION 1 IMAGING

- 12623 04 **Single image defogging and evaluation with deep neural networks without the need of ground truth** [12623-17]
- 12623 05 **Application of polarimetric imaging for automated visual inspection of freeze-dried vaccines** [12623-4]

SESSION 2 SYNTHETIC DATA FOR MACHINE LEARNING

- 12623 07 **Adapting synthetic training data in deep learning-based visual surface inspection to improve transferability of simulations to real-world environments** [12623-5]
- 12623 08 **Reinforcement learning optimized digital twin based synthetic data generation for defect detection of titanium spacer** [12623-6]
- 12623 09 **Synthetically generated microscope images of microtopographies using stable diffusion** [12623-7]

SESSION 3 MACHINE LEARNING AND CLASSIFICATION

- 12623 0A **Improved segmentation of damages on high-resolution coating images using CNN-based ensemble learning** [12623-8]
- 12623 0B **Multi-sensor data fusion using deep learning for bulky waste image classification** [12623-9]
- 12623 0C **High-accuracy robotic metrology for precise industrial manipulation tasks** [12623-15]

SESSION 4 IMAGE-BASED MEASUREMENT TECHNOLOGY

- 12623 0E **Differential perspective as a non-expensive distance sensing principle** [12623-11]
- 12623 0F **Unsupervised anomaly detection for industrial manufacturing using multiple perspectives of free falling parts** [12623-12]
- 12623 0G **Automated visual vegetation detection for weed management on transportation infrastructure** [12623-13]

SESSION 5 IMAGE-BASED POSITION MEASUREMENT

12623 OH **Multimodal RGB-D-T-scanning for interactive robot teaching** [12623-14]

12623 OI **High-speed optical sensing of pose, position, and surface normal for dynamic projection mapping** [12623-16]

POSTER SESSION

12623 OJ **Deep learning technique for generating sparse defects to improve image classification performance** [12623-18]

12623 OK **Development of CNN-based asymmetric label smoothing method for visual inspection** [12623-20]

Conference Committee

Symposium Chairs

Marc P. Georges, Université de Liège (Belgium)

Jörg Seewig, Technische Universität Kaiserslautern (Germany)

Conference Chairs

Jürgen Beyerer, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung IOSB (Germany) and Karlsruher Institut für Technologie (Germany)

Michael Heizmann, Karlsruher Institut für Technologie, Institute of Industrial Information Technology (Germany)

Conference Programme Committee

Christian Frese, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany)

Andreas Heinrich, Hochschule Aalen (Germany)

Bernd Jähne, Ruprecht-Karls-University Heidelberg (Germany)

Thomas Längle, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany)

Markus Maurer, VITRONIC Dr.-Ing. Stein Bildverarbeitungssysteme GmbH (Germany)

Wolfgang Osten, Universität Stuttgart (Germany)

Stephan Reichelt, Institute of Applied Optics, Universität Stuttgart (Germany)

Felix Salazar, Universidad Politécnica de Madrid (Spain)

Robert Schmitt, Fraunhofer-Institut für Produktionstechnologie (Germany)

Hugo Thienpont, Vrije Universiteit Brussel (Belgium)

Stefan Werling, Duale Hochschule Baden-Württemberg (Germany)

Ernst Wiedenmann, Serious Enterprises (Germany)

Volker Willert, Hochschule für angewandte Wissenschaften Würzburg-Schweinfurt (Germany)
