Volume 6947

Proceedings of SPIE, 0277-786X, v. 6947

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:
Author(s), "Title of Paper," in *Radar Sensor Technology XII*, edited by Kenneth I. Ranney, Armin W. Doerry, Proceedings of SPIE Vol. 6947 (SPIE, Bellingham, WA, 2008) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is $18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/08/$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

v *Conference Committee*

SESSION 1 PHENOMENOLOGY

6947 04 **Ka-band clutter measurements of urban environments** [6947-03]
R. J. Tan, T. J. Pizzillo, Army Research Lab. (USA)

6947 05 **Ultra-wideband signal propagation experiments in liquid media** [6947-04]
S. Challa, Louisiana Tech Univ. (USA); A. Mitra, Air Force Research Lab. (USA); R. Selmic, N. Simicevic, Louisiana Tech Univ. (USA)

SESSION 2 RADAR SIGNAL AND IMAGE PROCESSING

6947 06 **SAR data collection and processing requirements for high quality coherent change detection** [6947-05]
A. W. Doerry, Sandia National Labs. (USA)

6947 07 **Recovering shape from shadows in synthetic aperture radar imagery** [6947-06]
F. M. Dickey, A. W. Doerry, Sandia National Labs. (USA)

6947 08 **Recent MTI experiments using ARL's synchronous impulse reconstruction (SIRE) radar** [6947-07]
K. Ranney, A. Martone, L. Nguyen, B. Stanton, M. Ressler, D. Wong, F. Koenig, C. Tran, G. Kirose, G. Smith, K. Kappra, J. Sichina, Army Research Lab. (USA)

6947 09 **Narrowband frequency-hopping radars for the range estimation of moving and vibrating targets** [6947-08]
Y. Zhang, M. G. Amin, F. Ahmad, Villanova Univ. (USA)

6947 0A **Change detection using the synchronous impulse reconstruction (SIRE) radar** [6947-09]
K. Ranney, L. Nguyen, M. Ressler, B. Stanton, D. Wong, F. Koenig, C. Tran, G. Kirose, A. Martone, G. Smith, J. Sichina, K. Kappra, Army Research Lab. (USA)

SESSION 3 SENSING THROUGH-THE-WALL (STTW)

6947 0B **Sensing through the wall imaging using the Army Research Lab ultra-wideband synchronous impulse reconstruction (UWB SIRE) radar** [6947-10]
L. Nguyen, M. Ressler, J. Sichina, Army Research Lab. (USA)

6947 0C **High resolution through-the-wall radar image based on beamspace eigenstructure subspace methods** [6947-11]
Y.-S. Yoon, M. G. Amin, Villanova Univ. (USA)

6947 0D **Wall characterization for through-the-wall radar applications** [6947-12]
G. Greneker, RADAR Flashlight, LLC (USA) and Georgia Tech Research Institute (USA); E. O. Rausch, Georgia Tech Research Institute (USA)

6947 0E **Urban structures imaging with sparse arrays** [6947-13]
R. Innocenti, Army Research Lab. (USA)

6947 0F **Antenna array design for through wall imaging systems by means of information maximization** [6947-14]
J. Oaknin, R. Daisy, A. Beeri, Camero Tech Ltd. (Israel)

SESSION 4 RADAR SYSTEMS AND BIOMETRIC SENSING

6947 0G **A survey of antennas for ultra-wideband applications** [6947-15]
M. Sarfaraz, A. Shirkhodaie, Tennessee State Univ. (USA)

6947 0H **Low sidelobe nonlinear stepped-frequency waveforms** [6947-16]
D. Chebanov, City College of New York (USA)

6947 0I **Range and azimuth resolution enhancement for 94 GHz real-beam radar** [6947-17]
G. Liu, K. Yang, B. Sykora, I. Salha, BAE Systems (USA)

6947 0J **Battlefield triage life signs detection techniques** [6947-18]
O. Boric-Lubecke, Univ. of Hawaii at Manoa (USA) and Kai Sensors Inc. (USA); J. Lin, Univ. of Florida (USA); B.-K. Park, Kai Sensors Inc. (USA); C. Li, Univ. of Florida (USA); W. Massagram, Univ. of Hawaii at Manoa (USA); V. M. Lubecke, A. Host-Madsen, Univ. of Hawaii at Manoa (USA) and Kai Sensors Inc. (USA)

POSTER SESSION

6947 0K **The interaction of RF energy with wall materials** [6947-19]
D. Cohen, M. Farwell, U.S. Army CERDEC Intelligence and Information Warfare Directorate (USA); D. Sheby, M. Brennan, CACI Technologies (USA)

Author Index

Conference Committee

Symposium Chair

Larry B. Stotts, Defense Advanced Research Projects Agency (USA)

Symposium Cochair

Ray O. Johnson, Lockheed Martin Corporation (USA)

Program Track Chair

Roger Appleby, QinetiQ Ltd. (United Kingdom)

Conference Chairs

Kenneth I. Ranney, Army Research Laboratory (USA)
Armin W. Doerry, Sandia National Laboratories (USA)

Program Committee

Olga Boric-Lubecke, University of Hawaii at Manoa (USA)
John E. Gray, Naval Surface Warfare Center (USA)
Ryan K. Hersey, Georgia Institute of Technology (USA)
Todd A. Kastle, Air Force Research Laboratory (USA)
James L. Kurtz, University of Florida (USA)
Jenshan Lin, University of Florida (USA)
Victor M. Lubecke, University of Hawaii at Manoa (USA)
Lam H. Nguyen, Army Research Laboratory (USA)
Jeffrey P. Sichina, Army Research Laboratory (USA)
Jerry Silvious, Army Research Laboratory (USA)
Robert J. Tan, Army Research Laboratory (USA)
Lars M. Wells, Sandia National Laboratories (USA)

Session Chairs

1 Phenomenology
Kenneth I. Ranney, Army Research Laboratory (USA)

2 Radar Signal and Image Processing
James L. Kurtz, University of Florida (USA)

3 Sensing Through-the-Wall (STTW)
Lam H. Nguyen, Army Research Laboratory (USA)
Kenneth I. Ranney, Army Research Laboratory (USA)

4 Radar Systems and Biometric Sensing
Lam H. Nguyen, Army Research Laboratory (USA)
