Volume 8039

Proceedings of SPIE, 0277-786X, v. 8039

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Laser Technology for Defense and Security VII*, edited by Mark Dubinskii, Stephen G. Post, Proceedings of SPIE Vol. 8039 (SPIE, Bellingham, WA, 2011) Article CID Number.

ISSN 0277-786X
ISBN 9780819486134

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/11/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

The logo for SPIE Digital Library features the word "SPIE" in a bold, sans-serif font above the words "Digital Library" in a smaller, sans-serif font. To the right of the text is a stylized graphic consisting of three vertical bars of increasing height from left to right, with a curved line above them.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii *Conference Committee*

SESSION 1 BULK SOLID STATE LASERS I

8039 02 **Pulsed 2-micron lasers based on Tm³⁺-doped monoclinic double tungstate crystals (Invited Paper)** [8039-01]

X. Mateos, Física i Física i Cristal·lografia de Materials i Nanomaterials, CNR, Univ. Rovira i Virgili (Spain) and Max-Born-Institute for Nonlinear Optics and Short Pulse Spectroscopy (Germany); M. Segura, Física i Cristal·lografia de Materials i Nanomaterials, CNR, Univ. Rovira i Virgili (Spain); W. B. Cho, Ajou Univ. (Korea, Republic of); A. Schmidt, Max-Born-Institute for Nonlinear Optics and Short Pulse Spectroscopy (Germany); F. Rotermund, Ajou Univ. (Korea, Republic of); M. C. Pujol, J. J. Carvajal, M. Aguiló, F. Díaz, Física i Cristal·lografia de Materials i Nanomaterials, CNR, Univ. Rovira i Virgili (Spain); V. Panyutin, U. Griebner, V. Petrov, Max-Born-Institute for Nonlinear Optics and Short Pulse Spectroscopy (Germany)

8039 03 **Transparent ceramics for high-power solid-state lasers** [8039-02]

J. Sanghera, W. Kim, G. Villalobos, C. Baker, J. Frantz, B. Shaw, S. Bayya, U.S. Naval Research Lab. (United States); B. Sadowski, Global Strategies Group (United States); M. Hunt, Univ. Research Foundation (United States); I. Aggarwal, Sotera Defense Solutions (United States)

8039 04 **Tm-doped disordered molybdate crystals for ultrashort mode-locked solid state lasers** [8039-03]

M. D. Serrano, X. Han, M. Rico, C. Cascales, C. Zaldo, Instituto de Ciencia de Materiales de Madrid (Spain)

8039 05 **Resonantly diode pumped Ho³⁺:YVO₄ 2.1- μ m laser** [8039-04]

G. A. Newburgh, M. Dubinskii, U.S. Army Research Lab. (United States)

SESSION 2 BULK SOLID STATE LASERS II AND BEAM COMBINING

8039 0A **High efficiency Yb:YAG thin disk laser at room and cryogenic temperatures** [8039-48]

T. Carson, Air Force Research Lab. (United States); N. Vretenar, Ctr. for High Technology Materials, The Univ. of New Mexico (United States); T. C. Newell, Air Force Research Lab. (United States); P. Peterson, T. Lucas, Boeing LTS Inc. (United States); W. P. Latham, Air Force Research Lab. (United States)

SESSION 3 LASER DIODES I

8039 0B **Ultra-high-intensity 1550-nm single junction pulsed laser diodes** [8039-09]

J. F. Boucher, Laser Components Canada (Canada); J. J. Callahan, SemiNex Corp. (United States)

- 8039 OD **High-performance blue and green laser diodes based on nonpolar/semipolar GaN substrates** [8039-11]
M. C. Schmidt, C. Poblentz, Y.-C. Chang, B. Li, M. J. Mondry, J. Iveland, M. R. Krames, R. Craig, J. W. Raring, J. S. Speck, S. P. DenBaars, S. Nakamura, Soraa, Inc. (United States)
- 8039 OE **High-brightness diode pump sources for solid-state and fiber laser pumping across 8xx-9xx nm range** [8039-12]
R. Diamant, Y. Berk, S. Cohen, G. Klumel, M. Levy, Y. Openhaim, O. Peleg, D. Yanson, Y. Karni, SCD Semiconductor Devices (Israel)
- 8039 OF **Extending the locking range of VHG-stabilized diode laser bars using wavefront compensator phaseplates** [8039-13]
R. McBride, PowerPhotonic, Ltd. (United Kingdom); N. Trela, Heriot-Watt Univ. (United Kingdom); J. J. Wendland, PowerPhotonic, Ltd. (United Kingdom); H. J. Baker, Heriot-Watt Univ. (United Kingdom)

SESSION 4 FIBER LASERS: CW AND PULSED

- 8039 OH **Monolithic narrow linewidth polarization-maintaining thulium fiber laser using femtosecond laser written fiber Bragg gratings** [8039-15]
C. C. C. Willis, J. D. Bradford, R. A. Sims, L. Shah, M. Richardson, CREOL, The College of Optics and Photonics, Univ. of Central Florida (United States); J. Thomas, R. G. Becker, C. Voigtländer, Friedrich-Schiller-Univ. Jena (Germany); A. Tünnermann, S. Nolte, Friedrich-Schiller-Univ. Jena (Germany) and Fraunhofer Institute for Applied Optics and Precision Engineering (Germany)
- 8039 OI **Co-pumped 130-W monolithic single frequency fiber amplifier with an optically induced thermal gradient** [8039-16]
C. Zeringue, C. Vergien, I. Dajani, Air Force Research Lab. (United States)
- 8039 OK **Generation and amplification of femtosecond pulses in Tm:fiber** [8039-18]
R. A. Sims, P. Kadwani, L. Shah, M. Richardson, CREOL, The College of Optics and Photonics, Univ. of Central Florida (United States)
- 8039 OL **Atmospheric gas detection using broadband mid-IR thulium fiber-based sources** [8039-19]
P. Kadwani, R. A. Sims, CREOL, The College of Optics and Photonics, Univ. of Central Florida (United States); J. Chia, College of Optical Sciences, The Univ. of Arizona (United States); F. Altal, Masdar Institute of Science and Technology (United Arab Emirates); L. Shah, M. C. Richardson, CREOL, The College of Optics and Photonics, Univ. of Central Florida (United States)

SESSION 5 LASER DIODES II AND BEAM COMBINING

- 8039 ON **Extremely high-brightness kW-class fiber coupled diode lasers with wavelength stabilization (Invited Paper)** [8039-21]
R. K. Huang, B. Chann, J. D. Glenn, TeraDiode, Inc. (United States)

- 8039 00 **Progress in commercial wavelength-stabilized high-brightness diode sources suitable for pumping Yb-doped fiber lasers** [8039-22]
A. Brown, P. Leisher, G. Fanning, S. Lerner, Z. Chen, L. Bao, M. Grimshaw, M. DeVito, K. Price, K. Kennedy, S. Lin, M. Reynolds, S. Karlsen, J. Small, R. Martinsen, J. Haden, nLIGHT Corp. (United States)

SESSION 6 MID-IR LASERS AND MID-IR FIBER MATERIAL DEVELOPMENT

- 8039 0R **Oxide glasses for mid-infrared lasers (Invited Paper)** [8039-25]
B. D. O. Richards, A. Jha, G. Jose, X. Jiang, Univ. of Leeds (United Kingdom)
- 8039 0S **Integrated multispectral high-power laser platform for the defeat of heat-seeking missiles** [8039-26]
B. Tadjikov, A. Tsekoun, A. Lyakh, R. Maulini, R. Barron, C. K. N. Patel, Pranalytica, Inc. (United States)

SESSION 7 LASER MATERIAL DEVELOPMENT: SINGLE CRYSTALLINE, CERAMICS, FIBERS

- 8039 0W **Sub-micron grained highly transparent sesquioxide ceramics: synthesis, processing, and properties** [8039-30]
J. Ballato, Clemson Univ. (United States); K. Serivalsatit, Chulalongkorn Univ. (Thailand)
- 8039 0X **Development of ceramic fibers for high-energy laser applications** [8039-31]
G. E. Fair, Air Force Research Lab. (United States); H. J. Kim, H. Lee, T. A. Parthasarathy, K. A. Keller, UES, Inc. (United States); Z. D. Miller, Univ. of Notre Dame (United States)
- 8039 10 **Performance comparison of SCHOTT laser glasses** [8039-34]
M. J. Davis, J. S. Hayden, SCHOTT North America, Inc. (United States)
- 8039 11 **Low-noise single frequency all phosphate fiber laser** [8039-35]
P. Hofmann, CREOL, The College of Optics and Photonics, Univ. of Central Florida (United States) and College of Optical Sciences, The Univ. of Arizona (United States);
A. Pirson-Chavez, NP Photonics, Inc. (United States); A. Schülzgen, CREOL, The College of Optics and Photonics, Univ. of Central Florida (United States); L. Xiong, A. Laronche, J. Albert, Carleton Univ. (Canada); N. Peyghambarian, College of Optical Sciences, The Univ. of Arizona (United States) and NP Photonics, Inc. (United States)

SESSION 8 LASERS FOR SPECIFIC APPLICATIONS AND LATEST TECHNOLOGY FOR LASER FUNCTIONALITY

- 8039 13 **Multifunction laser source for ground and airborne applications** [8039-37]
B. Crépy, CILAS Orléans (France)
- 8039 14 **Laser sources for Raman spectroscopy** [8039-38]
J. Kilmer, A. Iadevaia, Y. Yin, Photonics Industries International, Inc. (United States)
- 8039 16 **Laser damage testing for ion beam sputtered optical coatings at 2 μ m and 3 μ m** [8039-40]
C. Wood, D. Carpenter, O. Lyngnes, Precision Photonics Corp. (United States)

POSTER SESSION

- 8039 17 **Ultrafast bandgap photonics for IR directional countermeasures and low observables** [8039-41]
M. K. Rafailov, The RICHER Group LLC (United States)
- 8039 18 **Spectral beam combining using superimposed reflective volume Bragg grating** [8039-42]
B. Shen, G. Zheng, J. Tan, Y. He, X. Li, Y. Yang, National Univ. of Defense Technology (China)
- 8039 1A **High energy microlaser and compact MOPA transmitter** [8039-46]
B. K. Brickeen, D. Bernot, E. Geathers, The Pennsylvania State Univ. Electro-Optics Ctr. (United States); J. Mosovsky, Allegheny College (United States)
- 8039 1B **Modeling first-order distributed feedback semiconductor lasers at NIR** [8039-47]
M.-M. Shih, Univ. of Florida (United States)

Author Index

Conference Committee

Symposium Chair

William Jeffrey, HRL Laboratories, LLC (United States)

Symposium Cochair

Kevin P. Meiners, Office of the Secretary of Defense (United States)

Conference Chairs

Mark Dubinskii, U.S. Army Research Laboratory (United States)

Stephen G. Post, Missile Defense Agency (United States)

Program Committee

Steven R. Bowman, U.S. Naval Research Laboratory (United States)

Scott Christensen, Nufern (United States)

Nils C. Fernelius, Air Force Research Laboratory (United States)

Walter Fink, High Energy Laser Joint Technology Office (United States)

Anthony M. Johnson, University of Maryland, Baltimore County (United States)

Mark W. Neice, High Energy Laser Joint Technology Office (United States)

Session Chairs

- 1 Bulk Solid State Lasers I
Mark Dubinskii, U.S. Army Research Laboratory (United States)
- 2 Bulk Solid State Lasers II and Beam Combining
Stephen G. Post, Missile Defense Agency (United States)
- 3 Laser Diodes I
Walter Fink, High Energy Laser Joint Technology Office (United States)
- 4 Fiber Lasers: CW and Pulsed
Scott Christensen, Nufern (United States)
- 5 Laser Diodes II and Beam Combining
Steven R. Bowman, U.S. Naval Research Laboratory (United States)
- 6 Mid-IR Lasers and Mid-IR Fiber Material Development
Stephen G. Post, Missile Defense Agency (United States)

- 7 Laser Material Development: Single Crystalline, Ceramics, Fibers
Mark Dubinskii, U.S. Army Research Laboratory (United States)
- 8 Lasers for Specific Applications and Latest Technology for Laser
Functionality
Mark Dubinskii, U.S. Army Research Laboratory (United States)
