Volume 11592

Proceedings of SPIE 0277-786X, V. 11592

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Nondestructive Characterization and Monitoring of Advanced Materials, Aerospace, Civil Infrastructure,
and Transportation XV, edited by Tzu-Yang Yu, Andrew L. Gyekenyesi, Proc. of SPIE Vol. 11592,
1159201 · © 2021 SPIE · CCC code: 0277-786X/21/\$21 · doi: 10.1117/12.2597425

Proc. of SPIE Vol. 11592 1159201-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Nondestructive Characterization and Monitoring of Advanced Materials, Aerospace, Civil Infrastructure, and Transportation XV*, edited by Tzu-Yang Yu, Andrew L. Gyekenyesi, Proc. of SPIE 11592, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

COMBINED USE OF NDE, SHM, AND ACCELERATED STRUCTURAL TESTING FOR CONCRETE BRIDGE DETERIORATION

- 11592 03 Combined use of NDE, SHM, and accelerated structural testing for better understanding of deterioration processes in concrete bridge decks (Keynote Paper) [11592-1]

RADAR NDE

- 11592 06 Factors affecting the delamination of detectability in GPR images [11592-4]
- 11592 07 Remote moisture quantification of concrete using SAR images and the K-R-I transform [11592-5]
- 11592 08 Comparing predicted in situ 8-year concrete strength by ground penetrating radar attributes and maturity method [11592-6]
- 11592 09 Detection of subsurface defects in concrete slabs using ground penetrating radar [11592-7]

NEW MATERIALS FOR NDE/SHM

- 11592 0B Passive sensing of a microparticle modified hybrid, fiber-reinforced composite [11592-9]
- 11592 0D Electromechanical analysis of CFRP for real-time structural self-sensing and non-destructive evaluation [11592-11]

NDE/SHM FOR NEW MATERIALS

- 11592 0F Acoustic emission to track the damage progress on thin-wall large-scale cement composites: damage mode and the effect of wave attenuation at intact and damage state [11592-14]

ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING FOR NDE/SHM

- 11592 0G Effect of sampling rates on the accuracy of acoustic-laser technique in defect detection and upsampling using machine learning [11592-15]
- 11592 0H Deep learning for structural health monitoring under environmental and operational variations [11592-16]

- 11592 0I Automated two-stage approach for detection and quantification of surface defects in concrete bridge decks [11592-17]
- 11592 0J Rail neutral temperature estimation using impulse vibration and machine learning [11592-18]

DIGITAL IMAGE CORRELATION (DIC)

- 11592 0K Identification and correlation of natural patterns using a hybrid BRISK-DIC method [11592-19]
- 11592 0L Coarse and fine localized CNN classifier for intelligent DIC preprocessing in large structure health monitoring sample [11592-20]

NEURAL NETWORKS AND STATISTICAL METHODS

- 11592 0O Assessment of flaw detectability using transfer function [11592-23]
- 11592 0P Damage assessment of RC arch structures using fractal analysis of crack patterns [11592-50]

SIMULATION TECHNIQUES FOR NDE/SHM

- 11592 0Q Optimizing raster scanning parameters in nondestructive evaluation using simulation of probe sensitivity field [11592-24]
- 11592 0R Analytical and experimental verification of environmental barrier coating (EBC) covering crack propagation, failure mechanisms, and life modeling [11592-25]
- 11592 0V FDTD simulation of near-field scattering pattern of a surface crack in plate-like structures for optimal inspection angle determination [11592-48]
- 11592 0W An algorithmic framework employing tensor decomposition and Bayesian inference for data reconstruction in intelligent transportation systems [11592-47]

PATTERN RECOGNITION AND OPTIMIZATION IN IMPEDANCE-BASED NDE

- 11592 0Y Damage study of structures using Hotteling's T^2 curve in electromechanical impedance method [11592-30]

NDE FOR MANUFACTURING

- 11592 10 Assessing visual and system flaw detectability in nondestructive evaluation [11592-32]

ACOUSTIC AND ULTRASONIC NDE/SHM

- 11592 11 **Ultrasonic dispersion and attenuation in bubbly liquids** [11592-33]
- 11592 13 **Manipulating the torsional mode in pipe-like structures with mechanical lens for extended propagation distance** [11592-35]
- 11592 14 **Detection of material nonlinearity using nonlinear ultrasonic three-wave mixing technique** [11592-36]

VIBRATION-BASED NDE/SHM

- 11592 17 **Developed Schmidt hammer based on jerk measurement** [11592-51]

POSTER SESSION

- 11592 1B **Sequential Monte Carlo based prediction of crack propagations in carbon fiber composites using electrical resistance measurement** [11592-42]
- 11592 1D **Short-term mechanical strength prediction of ultra-high performance concrete using noncontact synthetic aperture radar imaging** [11592-44]
- 11592 1E **In situ structural validation of components manufactured using fused filament fabrication** [11592-45]
- 11592 1G **Optical fiber sensing textile for temperature and strain distributed measurement** [11592-52]
