*Sponsored and Published by*  
SPIE

**Volume**  
**12215**

Proceedings of SPIE 0277-786X, V. 12215

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Optical Modeling and Performance Predictions XII, edited by Mark A. Kahan,  
Proc. of SPIE Vol. 12215, 1221501 · © 2022 SPIE  
0277-786X · doi: 10.1117/12.2661293

Proc. of SPIE Vol. 12215 1221501-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:  
Author(s), "Title of Paper," in *Optical Modeling and Performance Predictions XII*, edited by Mark A. Kahan, Proc. of SPIE 12215, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## TESTING, PIECE-PART CHARACTERIZATIONS, AND DIGITAL CAMERA SYSTEM SIMULATIONS

---

- 12215 02 **Impact of higher order surface irregularity on system-level wavefront variation across the field** [12215-2]
- 12215 03 **Axially symmetric retarder with radial retardance modulation** [12215-3]
- 12215 04 **Simulated formation of UV-cured polymer lenses on aqueous substrates** [12215-4]
- 12215 05 **Generating physics-based synthetic data for infrared/electro-optical system analysis and design** [12215-27]
- 12215 06 **Digital camera simulations of thin filaments in non-premixed laminar methane-air coflow flames** [12215-5]

---

## STOP

---

- 12215 07 **Subspace identification of low-dimensional Structural-Thermal-Optical-Performance (STOP) models of reflective optics** [12215-6]
- 12215 08 **Transient simulation of high-power dynamical-thermoelastic-optical systems** [12215-7]
- 12215 09 **Tailoring the stiffness of large mirrors to reduce specific optical aberrations** [12215-10]

---

## BRDF, POLARIZATION, AND DIFFRACTION THEORY

---

- 12215 0B **Evaluation of microfacet BRDF solar cell model modification using experimental data** [12215-12]
- 12215 0C **Determining solar cell BRDF model parameters by fitting to high-resolution out-of-plane measurement data** [12215-13]

- 12215 0D **Simulation of the polarimetric response of a microscopic semitransparent specimen with inner structure** [12215-14]
- 12215 0E **Experiments supporting the momentum exchange theory description for photon diffraction** [12215-15]

---

**SENSORS AND COMMUNICATION**

---

- 12215 0H **Polymer ring-resonator on a slotted membrane for ultrasound imaging** [12215-29]
- 12215 0J **Multimodal-capable, multiphoton miniaturized microscope for mice brain imaging** [12215-28]

---

**POSTER SESSION**

---

- 12215 0K **Spectral characterization of the RST prism assembly bandpass filters** [12215-24]
- 12215 0L **Convolution as a model of the LED irradiance pattern** [12215-25]

# Conference Committee

## *Program Track Chair*

**José Sasián**, Wyant College of Optical Sciences (United States)

## *Conference Chair*

**Mark A. Kahan**, Synopsys, Inc. (United States)

## *Conference Program Committee*

**George Z. Angeli**, GMTO Corporation (United States)

**Robert P. Breault**, Breault Research Organization, Inc. (United States)

**Robert J. Brown**, Ball Aerospace (United States)

**Thomas G. Brown**, The Institute of Optics, University of Rochester  
(United States)

**Bill J. Cassarly**, Synopsys, Inc. (United States)

**Russell A. Chipman**, Wyant College of Optical Sciences  
(United States)

**Keith B. Doyle**, MIT Lincoln Laboratory (United States)

**G. Groot Gregory**, Synopsys, Inc. (United States)

**Tony Hull**, The University of New Mexico (United States)

**Richard C. Juergens**, II-VI Aerospace & Defense, Inc. (United States)  
and Cimarron Optical Consulting, Inc. (United States)

**Marie B. Levine-West**, Jet Propulsion Laboratory (United States)

**H. Angus Macleod**, Thin Film Center, Inc. (United States)

**Gary W. Matthews**, ATA Aerospace, LLC (United States)

**Gregory J. Michels**, Sigmadyne, Inc. (United States)

**Duncan T. Moore**, University of Rochester (United States)

**David C. Redding**, Jet Propulsion Laboratory (United States)

**David A. Thomas**, GMTO Corporation (United States)

**James C. Wyant**, Wyant College of Optical Sciences (United States)

**Richard N. Youngworth**, Riyo LLC (United States)
